Chinese Leadership Chinese Leadership:

Leadership in a Changing China W. Chen,Y. Zhong,2005-01-14 Scholars from China Singapore and the U S use the opportunity of the 16th National Congress of the Chinese Communist Party to explore the issue of leadership change in China and its impact on institution building and foreign policy there *Chinese Politics in the Xi Jinping Era* Cheng Li,2016-10-18 Chinese politics are at a crossroads as President Xi Jinping amasses personal power and tests the constraints of collective leadership In the years since he became general secretary of the Chinese Communist Party in 2012 Xi Jinping has surprised many people in China and around the world with his bold anti corruption campaign and his aggressive consolidation of power Given these new developments we must rethink how we analyze Chinese politics an urgent task as China now has more influence on the global economy and regional security than at any other time in modern history *Chinese Politics in the Xi Jinping Era* examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that inner party democracy the concept of collective leadership that emphasizes deal making based on accepted rules and norms may pave the way for greater transformation within China s political system Xi s legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world s most populous and increasingly pluralistic country Cheng Li also addresses the recruitment and composition of the political elite a central concern in Chinese politics China analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th Central Committee including tables and charts detailing their family background education occupation career patterns and mentor patron ties **Elite Dualism and Leadership Selection in China** Xiaowei Zang,2004-03-01 Who are the top political leaders in China What are the major criteria in elite recruitment How is job promotion in high politics determined By studying over one and a half thousand top political Chinese leaders this book seeks to answer these questions and as a result defines how Chinese leadership is stratified Unlike existing research on Chinese leaders *Elite Dualism and Leadership Selection in China* draws on extensive statistical information and data analysis It evidences how political development in the reform era has led to the division of labour between the Chinese Communist Party CCP and the government in governance leading to two distinctive career paths in the two political systems respectively Key issues examined include the different criteria the CCP and the government demand the requirements for promotion the effect of university education on the rate of mobility the different affiliations of the two groups the role of cooptation in leadership selection Many of the elites discussed are still leading figures in China making this book the most up to date and extensive biographical data set in elite studies This allows for a meaningful analysis of elite behaviour in China for the first time in Chinese Studies This book will be useful to both students of Chinese studies and comparative politics and will also interest researchers political commentators statesmen and China watchers *The Culture of Leadership in Contemporary China* Paul Michael Linehan,2018 The resurgence of Confucianism Daoism and Buddhism in the context of Chinese leadership

values has emerged as a foundation for a new generation of leaders. The once in a decade transition of China's leadership witnessed the ascendancy of a consensus-oriented fifth generation of leaders supporting a central authoritative figure whose priority will likely include the reconciliation of a waning communist ideology juxtaposed with its ostensible embrace of capitalism. How will Chinese Communist Party authority, ideology, and control address the encroachment of Western values that are centered on Roman law, Greek philosophy, and Christian religion, which prioritizes individual freedom and democracy? This book examines the role of traditional Chinese values, ideology, and philosophy as a key determinant in modern China's leadership succession. The author asserts that as communist ideology wanes, Chinese leaders will turn to their own traditional values found in Confucianism, Daoism, and Buddhism to establish legitimacy to rule as they seek to promote Chinese prominence and greatness in the world. The author's research assesses China's promotion of its own traditional values in rejecting foreign value influence. Since the inception of modern China at the beginning of the 20th century, China's leadership transition has evolved from an authoritarian cult-like dictatorship to a consensus-oriented process. In researching this metamorphosis, this book offers social, political, cultural, and historical perspectives to demonstrate that Chinese human values and character factors have risen in prominence as key elements in the mandate of Chinese governance and leadership. The author concludes that Chinese leadership values and its study and diffusion across sectors of Chinese leadership, including business organizations and government, have become a means to accentuate Chinese values as a viable alternative to Western claims of absolute and universally accepted values.

China's Leaders David Shambaugh, 2021-06-25 Since the founding of the People's Republic of China over 70 years ago, five paramount leaders have shaped the fates and fortunes of the nation and the ruling Chinese Communist Party: Mao Zedong, Deng Xiaoping, Jiang Zemin, Hu Jintao, and Xi Jinping. Under their leaderships, China has undergone an extraordinary transformation from an undeveloped and insular country to a comprehensive world power. In this definitive study, renowned Sinologist David Shambaugh offers a refreshing account of China's dramatic post-revolutionary history through the prism of those who ruled it. Exploring the persona, formative socialization, psychology, and professional experiences of each leader, Shambaugh shows how their differing leadership styles and tactics of rule shaped China domestically and internationally. Mao was a populist tyrant, Deng a pragmatic Leninist, Jiang a bureaucratic politician, Hu a technocratic apparatchik, and Xi a modern emperor. Covering the full scope of these leaders' personalities and power, this is an illuminating guide to China's modern history and understanding how China has become the superpower of today.
