

Psychotherapy vs. counseling

	PSYCHOTHERAPY	COUNSELING
Focus	<p>Predominantly on chronic, recurrent issues. There may be a greater emphasis on a person's entrenched beliefs, patterns of thinking, or behaviors</p>	<p>Tends to be on more immediate or short-term issues. There may be a greater emphasis on the here-and-now or specific behaviors or circumstances</p>
Issues	<p>Related to complex emotional difficulties, long-standing problems, or mental health disorders</p>	<p>Tend to be more immediate in nature (adjustment issues, relationship issues, parenting, stress management, grief and loss, etc.)</p>
Types of therapy	<p>Psychotherapists use a number of therapeutic modalities depending on a person's needs as well as the therapist's own training and theoretical orientation. Some of those modalities are what you'd recognize as "talk therapy," while others may utilize other strategies.</p>	<p>The process is like a focused, purposeful conversation between the person and their counselor. Through those conversations, clients can explore issues and make powerful connections and insights. Therapists may also utilize CBT or other therapeutic modalities as part of the counseling process.</p>
Duration	<p>Tends to be longer in duration – weeks or months, even years for people with a severe chronic mental health issue.</p>	<p>Tends to be shorter in duration. Some issues can be addressed in 6-12 sessions. Other issues may take significantly longer.</p>
Credentials of a mental health professional	<p>In general, licensed mental health clinicians (LPC, LCSW, LMFT, or LP, to name a few) can diagnose and treat mental health conditions that are within their scope of practice, whether using counseling or psychotherapeutic interventions.</p> <p>So, for many people, the issue may not be as much about psychotherapist vs. counselor or a credential, but rather which clinician has the skills and expertise to provide the services for your particular set of needs.</p>

The volume is organized around the six general themes of history and professional development, personal counseling, career counseling, cross-cultural counseling, counseling process and outcome, and internationalizing Counseling Psychology. In presenting articles representing these six themes that have defined counseling psychology, readers are given an essential overview to the past, the present, and future directions of this applied specialty in psychology. Ethics in Counseling and Psychotherapy Elizabeth Reynolds Welfel, 2010 ETHICS IN COUNSELING AND PSYCHOTHERAPY prepares readers to deal effectively with the complex ethical and legal issues they will confront in practice. Dr. Welfel provides a ten-step model of ethical decision making that guides students and practitioners as they work through and analyze complicated ethics cases that demonstrate some of the most challenging dilemmas that they will face. In this new edition, Dr. Welfel provides the most current information on the market, including up-to-date coverage of the newly adopted ACA Code of Ethics and Standards of Practice and the APA Ethical Principles. Contemporary and relevant, the text familiarizes readers with the field's key scholarly writings and, by examining emerging ethical issues, enables students to advance beyond their basic awareness and knowledge of these professional codes of ethics. Publisher's website: Group Counseling and Psychotherapy with Children and Adolescents Zipora Shechtman, 2007 Many children and adolescents face developmental or situational difficulties in areas where they live most of their meaningful experiences at home, at school, and in the community. While adults who struggle with life events and stressors may look to professional help, young individuals are quite alone in coping with these situations. Perhaps unsurprisingly, most children and adolescents typically do not seek such help and often resist it when offered. Author Zipora Shechtman has written this detailed text advocating group counseling and psychotherapy as a viable means of addressing these issues if we are to ensure the psychological wellness of children in society. Group Counseling and Psychotherapy With Children and Adolescents is arranged in four parts. Its chapters explore topics including who needs group counseling and psychotherapy, therapeutic factors in children's groups, activities in the group, pre-group planning and forming a group, and how to enhance emotional experiencing and group support. This text is a principal source of information for counseling psychology students, researchers, and practitioners working with young people in addition to social workers, teachers, and parents.
