Module 1: the accountant as strategic business adviser

Part A: the need for advice

The quest for productivity

- Productivity – outputs as a ratio of the inputs – how efficient we are at producing goods & service
- Benefit of improved productivity can be shared

- Dramatic cost cutting / other short-term approaches -> can lead to false productivity
- Long term productivity improvement often requires investment in
 - Employee skills, training, development and culture, and combining this with new systems, technology and infrastructure
- Productivity – ethical dimension
 - Deploy people as resource in the most efficient manner – possible dehumanisation
 - Lower costs & productivity – can lead to safety & environmental degradation & reduction in living conditions
- High cost countries – focus higher up the value chain and must innovate and expand into new areas

Public Sector Reform and Performance Management in Emerging Economies Zahirul Hoque,2021-05-23 In the recent

decade governments worldwide are increasingly focusing on being community centric and outcomes based. Consequently they are starting to move towards outcomes based approaches to public financial management systems. An outcomes based approach allows government service agencies and specific program areas to organize and communicate priorities to achieve what matters and makes a difference rather than just going through the motions. Empirical evidence on how government agencies in emerging economies go about this contemporary approach and issues affecting these practices is limited. This edited collection of chapters is aimed at covering public sector reform and performance management in emerging economies with special reference to outcomes based approaches in practice in government services. Practices from developed economies contained in the first book on the topic have been published by Routledge in February 2021. The insights offered on the topic are written by renowned scholars who have identified important issues pertinent to those interested in public sector governance, accounting, accountability and performance management effectiveness in emerging economies. The book will be highly accessible to researchers, academics and students in the fields of accounting, public administration, development studies and other non accounting audiences alike.

Australian CPA, 2002 Cognitive Approaches to Specialist Languages Marcin Grygiel, 2017-05-11. Specialist languages such as the languages of law, business, aviation, football and politics can be perceived as highly conventionalized, semi natural and not fully autonomous communication codes limited to specific and predominantly formal situations. A large number of them can be best characterized by subject matter and semantic content but the most important distinctive element in their make up is the frame of context in which they are embedded. This volume discusses various ways of approaching the problems associated with the very broad phenomenon of specialist languages by means of the analytical mechanisms and theoretical conceptions developed within the framework of Cognitive Linguistics. The volume includes research carried out by world renowned experts in the field.
