Hydrological Modeling Ramakar Jha, V. P. Singh, Vivekanand Singh, L. B. Roy, Roshni Thendiyath, 2022-02-05 This book carefully considers hydrological models which are essential for predicting floods droughts soil moisture estimation land use change detection geomorphology and water structures. The book highlights recent advances in the area of

hydrological modelling in the Ganga Basin and other internationally important river basins. The impact of climate change on water resources is a global concern. Water resources in many countries are already stressed and climate change along with burgeoning population, rising standard of living and increasing demand are adding to the stress. Furthermore, river basins are becoming less resilient to climatic vagaries. Fundamental to addressing these issues is hydrological modelling which is covered in this book. Integrated water resources management is vital to ensure water and food security. Integral to the management is groundwater and solute transport and this book encompasses tools that will be useful to mitigate the adverse consequences of natural disasters.
