

CGG 204-212

❖ Science

- Dependent variable
 - Thing we want to explain
- Independent variable
 - Things we hypothesize will explain the dependent variable
- Positive coefficient
 - Indicates that an increase in explanatory variable is associated with an increase in the dependent variable
- Negative coefficient
 - Indicates an increase in the independent variable is associated with a reduction in the dependent variable
- Trust results if coefficient is more than twice the size of standard error

❖ Results

- Income
 - Dictatorship to democracy as GDP increases
- Economic growth
 - Dictatorships with more economic growth remain dictatorships
- Oil production
 - Dictatorships that depend on oil and fixed assets are less likely to become democracies
- Income is an important determinant of the emergence of democracy

Lecture 09/20

❖ Why are some mafias better?

- Really a question of why are some countries democratic and others aren't

❖ Social mobilization

- Classic modernization theory is criticized for lacking a clear causal mechanism
- Deutsch said that development is a revolutionary process that "brings with it an expansion of the politically relevant strata of the population" and places new demands on the state
- But you don't want the money, you want the political processes that produce the payouts
- Democracies are glorified insurance schemes

❖ Credible commitments

- North and Weingast
