 stability They tend to focus on the development and application of geomorphic principles for river restoration design Due to
 different models obtaining different results on the same problem incomplete or absent data and climatic social cultural
 changes the designers and managers of such projects frequently face high levels of uncertainty This book will provide a
 systematic overview of the issues involved in minimizing and coping with uncertainty in river restoration projects A series of
 thematic sections will be used to define the various sources of uncertainty in restoration projects and how these show at
 different points in the life cycle design construction and post construction phases of restoration projects The structure of the
 book will offer a rational theoretical analysis of the problem while providing practical guidance in managing the different
 sources of uncertainty A wide range of case studies will be included from Europe North America and Australasia *Moody's*
