Michael Mathiesen,2016-02-12 Computer code and human code found inside the DNA molecule that is the core of every cell in our bodies are practically identical in what they attempt to accomplish The only difference between the two types of code is that human code also includes the instructions to replicate the individual while the computer code has no such instruction set yet When they do this will give rise to many of the Science Fiction scenarios where some form of Artificial Intelligence attempts to take over the world and eliminate all humans as inferior pests In my previous book one that should be read prior to this one The Origin Of Creation we prove that human code is special in other ways too Human code can find its origins all the way back to The Big Bang what I call The Big Birth because there was no real Bang that made the universe although there may have been a deep Cry The next thing that happens after the incredible explosion of The Big Birth is the creation of the Code of Life only at this point in time it s really the Super Code the code that will determine where everything will snap into place in our universe and that

includes where our own individual life codes will come in to play Cracking the code details how easy it is to learn enough about your code of life so that you can crack it and alter it to suit your real goals or purpose in life When you realize how your own code is connected to everything else how simple the basic construction is and how to find your algorithm then the true focus meaning and the music of your life can arise up out of nowhere and you will finally know the truth about nearly everything that was before a mystery in Genetics research we call this EpiGenetics where it has been known for years that changing one's attitudes about certain subjects can in turn change one's actual genetic code People are able to cure diseases and accomplish the most miraculous things by merely thinking with such intensity and focus that their own code of life must be altered to take up the changes in personality Simple techniques are taught in this book that make it possible for anyone to accomplish what only great saints and mystics have been able to accomplish before Today we have all the information we need to locate the genes that present us with nearly every event in our lives The way to change our course through the heavens is simply to know the fabric of the heavens then code one's pathway through it so that our survival is assured

**Code Breaking Puzzles for Kids** Dan Moore, 2019-09-26 Code Breaking Puzzles For Kids Welcome to this brand new book containing no fewer than fifty code cracking puzzles for you to try Each puzzle has a difficulty level next to it so you can see how hard we think it will be to crack although everyone is different and so don't worry if sometimes you find a puzzle marked as easy to be difficult you may find you think some of the hard puzzles are easy One star next to a puzzle means it is relatively easy two stars for medium and three stars are reserved for what we think are the trickiest code cracking puzzles in the book Each puzzle is self contained so you don't need to solve the earlier puzzles to try the later puzzles in the book although you might like to work through in order as some of the easier puzzles are at the start and the first five puzzles have hints on how to try to crack the codes so will act as good warm up material for some of the more challenging codes to crack later on If you can solve the majority of the code puzzles in this book successfully and reveal all their hidden messages then you are well on your way to being a code breaker extraordinaire If you get stuck at any point then remember that some of these puzzles are deliberately hard so they will be challenging to solve It's always worth taking a break and coming back to a difficult puzzle later There are a wide range of different styles of puzzles to solve in this code puzzle book for children there are numerical codes letter codes symbolic codes codes hidden in pictures in word search grids in crosswords seemingly random text lists dots and dashes famous codes from history and much much more as every puzzle is different If you get stuck at any point talking to friends and family about a puzzle and solving it in a group can be great fun The suggested age range for the book is 8-12 although the easy puzzles marked with one star should be accessible to a younger age range perhaps 6 whilst the hard puzzles may prove challenging to teenagers Therefore the age range 8-12 is just a suggestion as individual abilities vary so much Here is an example of a two star middle level difficulty puzzle in this code breaking book for kids this is not one of the actual puzzles from the book but uses the exact same logic as the puzzle in the book so you can get

some idea of difficulty Can you read what it says FI OY EU JN YO OS VL NI TG IH CS DO TE EH WN TE IH KN OY WU LI EL JN YO HT SI OB KO We hope you enjoy the puzzles in this book and find solving the codes and revealing their secrets satisfying and fun All the solutions are included at the back of the book but also a clear explanation of how the answer is achieved There is nothing more frustrating than seeing an answer but not understanding how it is reached so we give details of the process needed to crack each and every code in the book Finally we want to say HPPE MVDL DPEFCSFBLFS
