Religion in the Media Age Stewart M. Hoover,2006-11-22 Looking at the everyday interaction of religion and media in our cultural lives Hoover s new book is a fascinating assessment of the state of modern religion Recent years have produced a marked turn away from institutionalized religions towards more autonomous individual forms of the search for spiritual meaning Film television the music industry and the internet are central to this process cutting through the monolithic assertions of world religions and giving access to more diverse and fragmented ideals While the sheer volume and variety of information travelling through global media changes modes of religious thought and commitment the human desire for spirituality also invigorates popular culture itself recreating commodities film blockbusters world sport and popular music as contexts for religious meanings Drawing on research into household media consumption Hoover charts the way in which media and religion intermingle and collide in the cultural experience of media audiences Religion in the Media Age is essential reading for everyone interested in how today mass media relates to contemporary religious and spiritual life

**Crafting Feminism from Literary Modernism to the Multimedia Present** Amy E. Elkins,2022 Crafting Feminism develops a dynamic study of craft and art making in modern and contemporary feminist writing In evocative readings of literary works from Virginia Woolf to Zadie Smith this book expands our sense of transartistic modernist scholarship to encompass process oriented and medium specific analyses of textile arts digital design collage photography painting and sculpture in literary culture By integrating these craft practices into the book s enlightening archive Elkins s theoretical argument extends a reading of craft metaphors into the material present Crafting Feminism demonstrates how writers have engaged with handiwork across generations and have undertaken the crafting of a new modernity one that is queer and feminist threaded messy shattered cut up pasted together preserved repaired reflected and spun out An avant garde work of scholarship this book interweaves queer research methods and interdisciplinary rigor with a series of surprising archival discoveries Making visible the collaborative creative features of craft Elkins captivates readers with generous illustrations

and a series of Techne interchapters interludes between longer chapters which powerfully convey the symbiosis between feminist theory and method and detail the network of archival influences that underpin this volume's hybrid approach. Foregrounding the work of decentering patriarchal and Eurocentric legacies of artistic authority Elkins champions the diverse intergenerational history of craft as a way to reposition intersectional makers at the heart of literary culture. An original and compelling study *Crafting Feminism* breaks new ground in modernist and visual studies digital humanities and feminist queer and critical race theory. *Finding the Fountain of Youth* Aharon W. Zorea, 2017-04-26 Separating truth from hype this book introduces readers to the topic of life extension in a holistic manner that provides scientific historical and cultural perspectives. While the story of 16th century explorer Juan Ponce de León futilely searching for the Fountain of Youth is likely a myth it is true that for many centuries mankind has sought a cure for aging. Today the anti aging and longevity industry is a multibillion dollar industry and medical advances are continuing to find ways to add to our time on earth. *Finding the Fountain of Youth The Science and Controversy behind Extending Life and Cheating Death* introduces readers to the topic of life extension in a holistic manner examining the topic through scientific historical and cultural perspectives. It also highlights key medical and ethical controversies related to this particular area of gerontology and serves as a gateway for further research and study. The book's chapters address the history of movements to remain youthful from ancient times through the modern era past medical advances that significantly extended the average lifespan and our cultural obsession with staying young that has spawned the anti aging industry. Readers will learn about basic principles of aging and anti aging as well as the science behind the methods both proven and hypothetical that serve to extend the lifespan. The final section of the book examines controversial issues and debates related to life extension such as global overpopulation length of life versus quality of life and socioeconomic concerns.
