## **Cost Benefit Analysis And Crime Control:**

**Cost-benefit Analysis and Crime Control** John Roman, Terence Dunworth, Kevin Marsh, 2010 This collaborative text examines the flow of decisions that go into designing and conducting a thorough analysis of a crime control program

**Costs and Benefits of Preventing Crime** Brandon Welsh, 2018-03-08 What are the cost savings from preventing a typical burglary robbery assault or even a criminal career Who benefits from these savings How often do the benefits from preventing crime or criminal behavior exceed the resources spent on preventing or controlling crime Is it more cost effective to invest in early childhood programs or juvenile boot camps to reduce criminal offending These are some of the important questions that face policymakers in crime and justice today Answering them is no easy task Nevertheless it is important to provide answers in order to ensure that the dollars devoted to crime reduction are spent as efficiently as possible The principle aim of Costs and Benefits of Preventing Crime is to report on and assess the present state of knowledge on the monetary costs and benefits of crime prevention programs Remarkably this crucial topic has rarely been studied up to the present time This book examines key methodological issues reports on the most up to date research findings discusses international policy perspectives and presents an agenda for future research and policy development on the economic analysis of crime prevention Throughout it addresses the important question of how governments should be allocating scarce resources to make crime prevention policy and practice more effective and to produce the greatest economic benefits to society The book brings together research and perspectives from across North America Europe and Australia *An Introduction to Economic Analysis in Crime Prevention [electronic Resource]* Cameron N. McIntosh, Jobina Li, National Crime Prevention Centre (Canada), Canada, Public Safety Canada, 2012 Although evidence based crime prevention has been identified as a priority in Canada's political and policy settings very little is known about the economic efficiency of crime prevention programs in the Canadian context This is an important issue given current fiscal constraints in this country and around the world To that end the objective of the following report is to provide an overview of two of the most widely used economic approaches to assessing the costs and or financial benefits of crime prevention programs Cost effectiveness analysis links program outcomes e.g. crime reduction to investment costs in order to estimate the per outcome expense of a crime prevention project Cost benefit analysis takes this a step further and attaches monetary values to program outcomes which are then compared to program costs in order to provide an estimate of the financial return on investment Issues and challenges associated with each type of economic analysis approach are discussed as well as recommendations for next steps

Lab, 2010-02-02 For a free 30 day online trial to this title visit [www.sagepub.com/freetrial](http://www.sagepub.com/freetrial) In many ways the two fields of victimology and crime prevention have developed along parallel yet separate paths and the literature on both has been scattered across disciplines as varied as sociology law and criminology public health and medicine political science and public policy economics psychology and

human services and others The Encyclopedia of Victimology and Crime Prevention brings together in one authoritative resource the dispersed information and knowledge on both victimology and crime prevention With nearly 375 entries this two volume set moves victimology and crime prevention one step further into recognized scholarly fields whose research informs practice and whose practice informs research Key Features Provides users with the most authoritative and comprehensive coverage available on victimology and crime prevention Presents victimology and crime prevention as their own separate justifiable disciplines rather than subfields within more established disciplines Discusses the status of victims within the criminal justice system as well as topics of deterring and preventing victimization in the first place and responding to victims needs Offers anchor essays written by leading scholars in their respective fields to provide starting points for investigating the more salient victimology and crime prevention topics Key Themes Business Prevention Actions Civil Justice System Correlates of Victimization Courts Alternative Remedies Courts Law and Justice Crime Prevention Crime Prevention Partnerships Criminal Justice System Fear of Crime Individual Protection Actions Interventions and Intervention Programs for Victim and Offender Intrafamilial Offenses Legislation and Statutes Media and Crime Prevention Methodology Offenses Special Topics Official Crime Data Personal Offenses Property Offenses Psychological Mental and Physical Health Issues Residential Community Crime Prevention School and Workplace Offenses School Based Crime Prevention Services and Treatment for Victims Theory Victimization Scales and Surveys Victimology Youth Focused Crime Prevention The victimology crime prevention nexus provides the foundation for a comprehensive and hopefully long lasting approach to addressing the public's risk of being victimized and aids individuals who are targeted by a criminal act This is a welcome addition to any academic library The availability in print and electronic formats provides students with convenient easy access wherever they may be

**Benefit-cost Analysis and Crime Prevention** John Chisholm,2000 *Economic Analysis and Efficiency in Policing, Criminal Justice and Crime Reduction* Matthew Manning,Shane D. Johnson,Nick Tilley,Gabriel T.W. Wong,Margarita Vorsina,2016-09-23 This monograph explains what economic analysis is why it is important and forms it can take in policing and criminal justice Costs are important in all forms of economic analysis but their collection tends to be partial and inadequate in capturing key information A practical guide to the collection is therefore also provided *The Economics of Crime Control* Llad Phillips,Harold L. Votey,1981-11 This book is about how public funds and human resources can be allocated to optimize the control of crime in a modern democratic society The authors build a model of crime generation and control through the imposition of sanctions that provides insight into alternatives for social policy makers Econometric techniques are used to analyze policy issues such as establishing control policies determining monetary measures of the seriousness of crime discerning community priorities for fighting crime choosing between alternative drug control programs and extracting useful information from crime data These techniques are also used to determine the effect of economic opportunities for youth on crime rates the influence of rising crime rates on police effectiveness the cost of police

effectiveness and the possibility for deterring violence Additional issues examined are the effect of handgun control on homicide rates the relative merits of jail and probation the rate of police manpower growth needed to keep pace with crime rates and the necessary data needed for planning an optimum level of public safety The analysis starts with single equation estimations and builds to system and multi equation models The statistical results are based on several data sets with the earlier studies using time series from the 1950 s and 1960 s The estimation of the more complex model is based on cross sectional data from the 1960 and 1970 census for the counties of California

**A Special Report to the Council on Criminal Justice** Patrick J. Riopelle, Thomas G. Everson, 1980

**Law Enforcement Planning** Jeffrey L.

Sedgwick, 1984-12-14 Is cost benefit analysis the best means to determine and formulate public policies To answer this question Jeffrey Leigh Sedgwick examines its application to crime and criminal justice and the implications of that application In this interdisciplinary study Sedgwick first assesses the value of applying economic models to the social problem of crime He compares economic models to sociological ones and then addresses the question of whether economic models are compatible with the values of a liberal political order He shows that cost benefit analysis suffers from technical and ethical problems when used to set law enforcement goals Current techniques for measuring the costs of crime are crude and unreliable he argues and overreliance on citizen and consumer preference may lead to the adoption of policies incompatible with American political traditions and respect for human rights Sedgwick concludes that economic analysis cannot by itself lead to the adoption of effective and publicly defensible policies to combat crime

**Crime Control Strategies** Harold E. Pepinsky, 1980 This fresh readable and original work uses a social systems perspective to show how data about crime and criminal justice can be used to create crime control strategies

**The Costs of Crime** Charles M. Gray, 1979-12

**Hidden in Plain Sight** Paul Heaton, 2010 Many state and local governments are facing significant fiscal challenges forcing policymakers to confront difficult trade offs as they consider how to allocate scarce resources across numerous worthy initiatives To achieve their policy priorities it will become increasingly important for policymakers to concentrate resources on programs that can clearly demonstrate that they improve their constituents quality of life To identify such programs cost benefit analysis can be a powerful tool for objectively adjudicating the merits of particular programs On the surface all such programs aim to improve quality of life but whether they actually achieve or will achieve what they aim for is another question Summarizing the existing high quality academic research on the cost of crime and the effectiveness of police in preventing crime this paper familiarizes policymakers and practitioners with current research on these issues and demonstrates how this research can be used to better understand the returns to investments in police It demonstrates a method for comparing the costs of police personnel with the expected benefits generated by those police in terms of reduced crime Applying the method to several real world scenarios shows that these investments generate net social benefits Returns on investments in police personnel are likely to be substantial
