Ellen Marie Pint,Laura H. Baldwin,1997 This report originally prepared as an annotated briefing discusses the recommendations of the economics and business management literatures on issues related to outsourcing It is found that organizations should outsource those activities that can be most effectively managed externally so that senior managers can devote their attention to activities best managed internally The economics literature emphasizes that activities involving transaction specific assets should be managed internally whereas the business management literature recommends that organizations retain internal control of their core competencies Organizations can often gain access to superior performance at equal or lower cost by outsourcing other activities Therefore it seems prudent for the Air Force to focus its outsourcing efforts on activities that are neither core competencies nor involve great asset specificity although the business management literature suggests that the Air Force could outsource activities that do involve asset specificity such as the provision of complex services if it develops longer term partnerships with suppliers rather than treating them as arm s length vendors Also past performance information could be used to advantage in outsourcing to develop longer term relationships and encourage transaction specific investments      Catalog of Copyright Entries Library of Congress. **Public Sector Reform** World Bank. Independent Evaluation Group,2008 The effectiveness and efficiency of a country s public sector is vital to the success of development activities including those the World Bank supports Sound financial management an efficient civil service and administrative policy efficient and fair collection of taxes and transparent operations that are relatively free of corruption all contribute to good delivery of public services The Bank has devoted an increasing share of its lending and advisory support to the reform of central governments so it is important to understand

what is working what needs improvement and what is missing IEG has examined lending and other kinds of Bank support in 1999 2006 for public sector reform in four areas public financial management administrative and civil service revenue administration and anticorruption and transparency Although a majority of countries that borrowed to support public sector reform experienced improved performance in some dimensions there were shortcomings in important areas and in overall coordination The frequency of improvement was higher among IBRD borrowers than among IDA borrowers Performance usually improved for public financial management tax administration and transparency but did not usually with respect to civil service Direct measures to reduce corruption such as anticorruption laws and commissions rarely succeeded
