Elaine Biech, 2016-12-01 There are more similarities than differences between how artists and scientists work Both ask countless questions Both search in earnest for answers Both are dedicated to reaching the best results Not so different from today's trainers are they Elaine Biech one of the most highly regarded names in talent development has set out to identify the perfect blend of content mastery and audience insight The result is this highly informative book The Art and Science of Training presents the science for learning and development but it also emphasizes that training success lies in knowing what to do when things don't go as planned Discover how top facilitators always put learners first even when faced with exceptions to the rule the unwilling learner the uninformed supervisor the inappropriate delivery medium or the unmanageable performance challenge And learn why you must understand people not only content to ensure consistently exceptional learning experiences Science is both a body of knowledge and a process Art is the expression of creativity and imagination Where they intersect is the best way to help others learn and grow      *Active Training* Melvin L.
