Our resource introduces the mathematical concepts taken from real life experiences and provides warm up and timed practice questions to strengthen procedural proficiency skills. Use different shapes to make a robot or house. Describe where each shape is found in a picture. Transform a shape by turning it, sliding it or flipping it. Draw the missing half of a symmetrical shape. Match items in your classroom with certain shapes. Identify circles from squares and triangles. Count the number of sides and corners of plane shapes. Count the number of edges, faces and corners of solid shapes. The task and drill sheets provide a leveled approach to learning starting with prekindergarten and increasing in difficulty to grade 2. Aligned to your State Standards and meeting the concepts addressed by the NCTM standards, reproducible task sheets, drill sheets, review and answer key are included.

The lessons and worksheets are organized into seven sections, each covering one major area of geometry and presented in an easy-to-follow format including title, focusing on a specific skill, learning objective, special materials, if any, teaching notes with step-by-step directions, answer key, and reproducible student activity sheets. Activities in sections 1-6 are presented in order of difficulty within each section, while those in Part 7, A Potpourri of Geometry, are open-ended and may be used with most middle and high school classes. Many activities throughout the book may be used with calculators and computers in line with the NCTM's recommendations.
