BASIC ELECTRONICS KAL, SANTIRAM, 2009-01-14. This comprehensive and well organized text discusses the fundamentals of electronic communication such as devices and analog and digital circuits which are so essential for an understanding of digital electronics. Professor Santiram Kal, with his wealth of knowledge and his years of teaching experience, compresses within the covers of a single volume all the aspects of electronics, both analog and digital, encompassing devices such as microprocessors, microcontrollers, fibre optics and photonics. In so doing, he has struck a fine balance between analog and digital electronics. A distinguishing feature of the book is that it gives case studies in modern applications of electronics, including information technology, that is DBMS, multimedia, computer networks, Internet and optical communication. Worked out examples interspersed throughout the text and the large number of diagrams should enable the student to have a better grasp of the subject. Besides exercises given at the end of each chapter, which will sharpen the student's mind in self study, these student friendly features are intended to enhance the value of the text and make it both useful and interesting.

Algorithms in Advanced Artificial Intelligence R. N. V. Jagan Mohan, Vasamsetty Chandra Sekhar, V. M. N. S. S. V. K. R. Gupta, 2024-07-08. The most common form of severe dementia, Alzheimer's disease (AD), is a cumulative neurological disorder because of the degradation and death of nerve cells in the brain tissue. Intelligence steadily declines and most of its activities are compromised in AD. Before diving into the level of AD diagnosis, it is essential to highlight the fundamental differences between conventional machine learning (ML) and deep learning (DL). This work covers a number of photo preprocessing approaches that aid in learning because image processing is

essential for the diagnosis of AD The most crucial kind of neural network for computer vision used in medical image processing is called a Convolutional Neural Network CNN The proposed study will consider facial characteristics including expressions and eye movements using the diffusion model as part of CNN s meticulous approach to Alzheimer s diagnosis Convolutional neural networks were used in an effort to sense Alzheimer s disease in its early stages using a big collection of pictures of facial expressions
