Assessing Negative Response Bias in Competency to Stand Trial Evaluations Steven J. Rubenzer, 2018-03-22 Assessing Negative Response Bias in Competency to Stand Trial Evaluations provides readers with a comprehensive guide to assessing whether a defendant has feigned mental impairment during a competency to stand trial evaluation or simply did not put forth his/her best effort. This book reviews the literature on assessing feigning and negative response bias with particular focus on issues, tests, and data relevant to CST evaluations and examines proposed criteria and statistical methods of determining and classifying assessment results. It introduces readers to aspects of the vibrant neuropsychological response style literature, an area many forensic psychologists appear to have overlooked. Additionally, it offers recommendations for research and policy regarding the parameters of CST assessment.
