Mendelsohn, 1998-12-31 That concern about human genetics is at the top of many lists of issues requiring intense discussion from scientific, political, social, and ethical points of view is today no surprise. It was in the spirit of attempting to establish the basis for intelligent discussion of the issues involved that a group of us gathered at a meeting of the International Society for the History, Philosophy, and Social Studies of Biology in the Summer of 1995 at Brandeis University and began an exploration of these questions in earlier versions of the papers presented here. Our aim was to cross disciplines and jump national boundaries to be catholic in the methods and approaches taken and to bring before readers interested in the emerging issues of human genetics well reasoned, informative and provocative papers. The initial conference and elements of the editorial work which have followed were generously supported by the Stifterverband für die Deutsche Wissenschaft. We thank Professor Peter Weingart of Bielefeld University for his assistance in gaining this support. As Editors we thank the anonymous readers who commented upon and critiqued many of the papers and in turn made each paper a more valuable contribution. We also thank the authors for their understanding and patience. They base their claims on historical case studies purporting

to show the systematic intrusion of sexist racist capitalist colonialist and or professional interests into the very content of science In this hard hitting collection of essays contributors offer crisp and detailed critiques of case studies offered by the cultural critics as evidence that scientific results tell us more about social context than they do about the natural world Pulling no punches they identify numerous crude factual blunders e g that Newton never performed any experiments and egregious errors of omission such as the attempt to explain the slow development of fluid dynamics solely in terms of gender bias Where there are positive aspects of a flawed account or something to be learned from it they do not hesitate to say so Their target is shoddy scholarship Comprising new essays by distinguished scholars of history philosophy and science this book raises a lively debate to a new level of seriousness General Catalogue of the Books Except Fiction, French, and German, in the Public Library of Detroit, Mich Detroit Public Library,1889
