

Physical Changes

the following illustrate physical changes. They are not chemical changes, because they do not change the properties of the materials.

- the breaking of a nail - changing the shape of the material.
- the breaking of a piece of chalk - changing the shape of the material.
- the melting of ice - changing the state of the material.

Physical changes involving the water cycle are:

- the evaporation of water - changing the state of the material.
- the condensation of water - changing the state of the material.
- the sublimation of snow - changing the state of the material.
