# Chapter 02: Programming In C      Class X

## Short Questions

**Q2. Give short answers to the following questions.**

**i.**      **Define computer program.**

A program is a set of instruction(statements) written in a programming language to solve a particular problem.

Or

A program is a set of instruction that tells the computer what to do and how to do.

**ii.**      **Differentiate between syntax and semantic.**

| Syntax | Semantic |
|---|---|
| i. Rules of a programming language. | i. Gives meaning to statement. |
| ii. Describes the way to write correct statement in a program. | ii. Describes the sequence of operation to be performed by a computer. |

**iii.**      **Write three differences between assembly language and HLLs.**

| Assembly Language | High Level language |
|---|---|
| i. Consists of symbolic code or abbreviations known as mnemonics. | i. Use English language words such as print, go to, if, end. |
| ii. Use assembler to convert assembly language to machine language. | ii. Use compiler interpreter to convert high level language to machine code. |
| iii. Requires more attention to detail. | iii. Requires less attention to detail. |

**iv.**      **Write four characteristics of HLLs.**

1. These languages were developed to make computer programming simple, easier and less prone to errors.
2. The process of finding and removing errors in programs (debugging) is easier in high-level languages compared to low level language.
3. Program written in high-level language must be translated into machine language by a compiler or an interpreter before execution by the computer.
4. High-level languages are not machine dependent. They enable programmers to write programs that are independent of a particular type of computer.

**v.**      **Define Integrated Development Environment (IDE).**

IDE is a software that bring all the processes and tools required for program development into one place. It provides an ease to the programmer.
