This book constitutes the thoroughly refereed post proceedings of the International Computer Music Modeling and Retrieval Symposium CMMR 2004 held in Esbjerg Denmark in May 2004 The 26 revised full papers presented were carefully selected during two rounds of reviewing and improvement Due to the interdisciplinary nature of the area the papers address a broad variety of topics The papers are organized in topical sections on pitch and melody detection rhythm tempo and beat music generation and knowledge music performance rendering and interfaces music scores and synchronization synthesis timbre and musical playing music representation and retrieval and music analysis Evolutionary Computer Music Eduardo R.

Miranda,John Al Biles,2007-10-12 Musicians perhaps more than any other class of artists have always been acutely aware of the scientific developments of their time From the discovery almost three thousand years ago of the direct relationship between the pitch of a note and the length of a string or pipe to the latest computer models of human musical cognition and intelligence musicians have always looked to science to provide new and challenging ways to study and compose music With the great scientific advances being made in the field of evolutionary biology from new insights into the origins of humans and other species to complete mappings of the genes that control our growth and development a new approach to the study of music is emerging the evolutionary computation approach This book features chapters on the interplay between Evolutionary Computation and Music by leading pioneers in the field **Computational Phonogram Archiving** Rolf Bader,2019-01-25

The future of music archiving and search engines lies in deep learning and big data Music information retrieval algorithms automatically analyze musical features like timbre melody rhythm or musical form and artificial intelligence then sorts and relates these features At the first International Symposium on Computational Ethnomusicological Archiving held on November 9 to 11 2017 at the Institute of Systematic Musicology in Hamburg Germany a new Computational Phonogram Archiving standard was discussed as an interdisciplinary approach Ethnomusicologists music and computer scientists systematic musicologists as well as music archivists composers and musicians presented tools methods and platforms and shared fieldwork and archiving experiences in the fields of musical acoustics informatics music theory as well as on music storage reproduction and metadata The Computational Phonogram Archiving standard is also in high demand in the music market as a search engine for musicconsumers This book offers a comprehensive overview of the field written by leading researchers around the globe Ontologies and Big Data Considerations for Effective Intelligence Lu, Joan,Xu,

Qiang,2017-02-08 Across numerous industries in modern society there is a constant need to gather precise and relevant data efficiently and quickly As such it is imperative to research new methods and approaches to increase productivity in these areas Ontologies and Big Data Considerations for Effective Intelligence is a key source on the latest advancements in multidisciplinary research methods and applications and examines effective techniques for managing and utilizing

information resources Featuring extensive coverage across a range of relevant perspectives and topics such as visual analytics spatial databases retrieval systems and ontology models this book is ideally designed for researchers graduate students academics and industry professionals seeking ways to optimize knowledge management processes *Computer Music Modeling and Retrieval*, 2005 **Applications of Evolutionary Computing** Mario Giacobini, 2007 Bridging Music Informatics with Music Cognition Naresh N. Vempala, Frank A. Russo, Geraint A. Wiggins, 2018-09-14 Music informatics is an interdisciplinary research area that encompasses data driven approaches to the analysis generation and retrieval of music In the era of big data two goals weigh heavily on many research agendas in this area a the identification of better features and b the acquisition of better training data To this end researchers have started to incorporate findings and methods from music cognition a related but historically distinct research area that is concerned with elucidating the underlying mental processes involved in music related behavior **ISMIR 2007** Simon Dixon, David Bainbridge, Rainer Typke, 2007 **Advances in Soft Computing** Grigori Sidorov, Arturo Hernández Aguirre, Carlos Alberto Reyes Garcia, 2010-10-31 Artificial intelligence AI is a branch of computer science that models the human ability of reasoning usage of human language and organization of knowledge solving problems and practically all other human intellectual abilities Usually it is characterized by the application of heuristic methods because in the majority of cases there is no exact solution to this kind of problem Soft computing can be viewed as a branch of AI that deals with the problems that explicitly contain incomplete or complex information or are known to be impossible for direct computation i e these are the same problems as in AI but viewed from the perspective of their computation The Mexican International Conference on Artificial Intelligence MICA I a yearly international conference series organized by the Mexican Society for Artificial Intelligence SMIA is a major international AI forum and the main event in the academic life of the country s growing AI community In 2010 SMIA celebrated 10 years of activity related to the organization of MICA I as is represented in its slogan Ten years on the road with AI MICA I conferences traditionally publish high quality papers in all areas of artificial intelligence and its applications The proceedings of the previous MICA I events were also published by Springer in its Lecture Notes in Artificial Intelligence LNAI series vols 1793 2313 2972 3789 4293 4827 5317 and 5845 Since its foundation in 2000 the conference has been growing in popularity and improving in quality *Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur*, 2004
