Computer Network Architectures And Protocols Applications Of Communications Theory:

Computer Network Architectures and Protocols Carl A. Sunshine,2013-06-29 This is a book about the bricks and mortar from which are built those edifices that will permeate the emerging information society of the future computer networks For many years such computer networks have played an indirect role in our daily lives as the hidden servants of banks airlines and stores Now they are becoming more visible as they enter our offices and homes and directly become part of our work entertainment and daily living The study of how computer networks function is a combined study of communication theory and computer science two disciplines appearing to have very little in common The modern communication scientist wishing to work in this area soon finds that solving the traditional problems of transmission modulation noise immunity and error bounds in getting the signal from one point to another is just the beginning of the challenge The communication must be in the right form to be routed properly to be handled without congestion and to be understood at various points in the network As for the computer scientist he finds that his discipline has also changed The fraction of computers that belong to networks is increasing all the time And for a typical single computer the fraction of its execution load storage occupancy and system management problems that are involved with being part of a network is also growing

Data, Security, and Trust in Smart Cities Stan McClellan,2024-06-26 This book provides a comprehensive perspective on issues related to the trustworthiness of information in the emerging Smart City Interrelated topics associated with the veracity of information are presented and discussed by authors with authoritative perspectives from multiple fields The focus on security veracity and trustworthiness of information data societal structure and related topics in connected cities is timely important and uniquely presented The authors cover issues related to the proliferation of disinformation and the mechanics of trust in modern society Topical issues include trust in technologies such as the use of machine learning ML and artificial intelligence AI the importance of encryption and cybersecurity and the value of protecting of critical infrastructure Structural issues include legal and governmental institutions including the basis and importance of these fundamental components of society Functional issues also include issues of societal trust related to healthcare medical practitioners and the dependence on reliability of scientific results Insightful background on the development of AI is provided and the use of this compelling technology in applications spanning networks supply chains and business practices are discussed by practitioners with direct knowledge and convincing perspective These thought provoking opinions from notable industry academia medicine law and government leaders provide substantial benefit for a variety of stakeholders
