In this Internet-oriented society, specialists need to be trained to run and manage the Internet part of the Internet or an organization's network that is connected to the Internet. Using a bottom-up approach, **Data Communications and Networking** presents this highly technical subject matter without relying on complex formulas by using a strong pedagogical approach supported by more than 830 figures. Now in its Fifth Edition, this textbook brings the beginning student right to the forefront of the latest advances in the field while presenting the fundamentals in a clear, straightforward manner. Students will find better coverage, improved figures, and better explanations on cutting-edge material.
