**The Innovation Delusion** Lee Vinsel, Andrew L. Russell, 2020-09-08 Innovation is the hottest buzzword in business But what if our obsession with finding the next big thing has distracted us from the work that matters most The most important book I ve read in a long time It explains so much about what is wrong with our technology our economy and the world and gives a simple recipe for how to fix it Focus on understanding what it takes for your products and services to last Tim O Reilly founder of O Reilly Media It s hard to avoid innovation these days Nearly every product gets marketed as being disruptive whether it s genuinely a new invention or just a new toothbrush But in this manifesto on the state of American work historians of technology Lee Vinsel and Andrew L Russell argue that our way of thinking about and pursuing innovation has made us poorer less safe and ironically less innovative Drawing on years of original research and reporting The Innovation Delusion shows how the ideology of change for its own sake has proved a disaster Corporations have spent millions hiring chief innovation officers while their core businesses tank Computer science programs have drilled their students on programming and design even though the overwhelming majority of jobs are in IT and maintenance In countless cities suburban sprawl has left local governments with loads of deferred repairs that they can t afford to fix And sometimes innovation even kills like in 2018 when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people In this provocative deeply researched book Vinsel and Russell tell the story of how we devalued the work that underpins modern life and in doing so wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street s greed The authors offer a compelling plan for how we can shift our focus away

from the pursuit of growth at all costs and back toward neglected activities like maintenance care and upkeep For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed The Innovation Delusion is a deeply necessary reevaluation of a trend we can still disrupt **Network World** ,1986-10-13 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce *Iron and Steel Engineer* ,1998 Contains the proceedings of the
