Computers In Translation A Practical Appraisal:

Computers in Translation John Newton, 2002-09-11 Researchers have been attempting to develop systems that would emulate the human translation process for some forty years What is it about human language that makes this such a daunting challenge While other software packages have achieved rapid and lasting success machine translation has failed to penetrate the worldwide market to any appreciable extent Does this merely reflect a reluctance to adopt it or does it signal a more fundamental and intractable problem *Computers in Translation* is a comprehensive guide to the practical issues surrounding machine translation and computer based translation tools Translators system designers system operators and researchers present the facts about machine translation its history its successes its limitations and its potential Three chapters deal with actual machine translation applications discussing installations including the METEO system used in Canada to translate weather forecasts and weather reports and the system used in the Foreign Technology Division of the US Air Force

Computers and Translation Harold Somers, 2003-05-28 This volume is about computers and translation It is not however a Computer Science book nor does it have much to say about Translation Theory Rather it is a book for translators and other professional linguists technical writers bilingual secretaries language teachers even which aims at clarifying explaining and exemplifying the impact that computers have had and are having on their profession It is about Machine Translation MT but it is also about Computer Aided or Assisted Translation CAT computer based resources for translators the past present and future of translation and the computer The editor and main contributor Harold Somers is Professor of Language Engineering at UMIST Manchester With over 25 years experience in the field both as a researcher and educator Somers is editor of one of the field's premier journals and has written extensively on the subject including the field's most widely quoted textbook on MT now out of print and somewhat out of date The current volume aims to provide an accessible yet not overwhelmingly technical book aimed primarily at translators and other users of CAT software

A Dictionary of Translation Technology Sin-wai Chan, 2004 This dictionary is intended for anyone who is interested in translation and translation technology Especially translation as an academic discipline a language activity a specialized profession or a business undertaking The book covers theory and practice of translation and interpretation in a number of areas Addressing and explaining important concepts in computer translation computer aided translation and translation tools Most popular and commercially available translation software are included along with their website addresses for handy reference This dictionary has 1 377 entries The entries are alphabetized and defined in a simple and concise manner

Repairing Texts Hans P. Krings, 2001 This study challenges the idea that given the effectiveness of machine translation major costs could be reduced by using monolingual staff to post edit translations It presents studies of machine translation systems and current research into translation process

Translation and Technology Chiew Kin Quah, 2006-04-12 Chiew Kin Quah draws on years of academic and professional experience to provide an account of translation technology its applications

and capabilities Major developments from North America Europe and Asia are described including developments in uses and users of the technology Traduction Harald Kittel, 2004 This international encyclopedia documents and surveys for the first time the entire complex of translation as well as the operations and phenomena associated with it Structured along systematic historical and geographic lines it offers a comprehensive and critical account of the current state of knowledge and of international research The Encyclopedia 1 offers an overview of the different types and branches of translation studies 2 covers translation phenomena including the entire range of interlingual intralingual and intersemiotic transfer and transformation in their social material linguistic intellectual and cultural diversity from diachronic synchronic and systematic perspectives 3 documents and elucidates the most important results of the study of translation to the present day as well as the current debates taking into account theoretical assumptions and methodological implications 4 identifies where possible lacunae in existing research listing priorities and desiderata for further research The languages of publication are German English and French **A Chronology of Translation in China and the West** Sin-wai Chan, 2009 This book is a study of the major events and publications in the world of translation in China and the West from its beginning in the legendary period to 2004 with special references to works published in Chinese and English It covers a total of 72 countries places and 1 000 works All the events and activities in the field have been grouped into 22 areas or categories for easy referencing This book is a valuable reference tool for all scholars working in the field of translation **History of the Language Sciences / Geschichte der Sprachwissenschaften / Histoire des sciences du langage. 3.
