Concept Analysis in Nursing John Paley,2021-02-15 Concept analysis is an established genre of inquiry in nursing introduced in the 1970s Currently over 100 concept studies are published annually yet the methods used within this field have rarely been questioned In Concept Analysis in Nursing A New Approach Paley provides a critical analysis of the philosophical assumptions that underpin nursing s concept analysis methods He argues provocatively that there are no such things as concepts as traditionally conceived Drawing on Wittgenstein and Construction Grammar the book first makes a case for dispensing with the traditional concept of a concept and then provides two examples of a new approach examining the use of hope and moral distress Casting doubt on the assumption that hope always stands for an inner state of the person the book shows that the word s function varies with the grammatical construction it appears in Similarly it argues that moral distress is not the name of a mental state but a normative classification used to bolster a narrative concerning nursing s identity Concept Analysis in Nursing is a fresh and challenging book written by a philosopher interested in nursing It will appeal to researchers and postgraduate students in the areas of nursing health philosophy and linguistics It will also interest those familiar with the author s previous book Phenomenology as Qualitative Research

Theoretical Nursing Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in

other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher The Micro Goes to School Andria Troutman,James A.
