

Practical-4

AIM: Understand and identify Layer-2 functionality.

Tools required:

1. Desktop Computer
2. Cisco Packet Tracer

Simulate different scenarios given below in Cisco packet tracer and fill up table.

Note: While applying IP address, student need to allocate IP address as per his/her student ID. For Example, if student ID is 20ce005 then IP address allocation for first network should start with 5.0.0.0. For subsequent network, it should start with ID+1 i.e. 6.0.0.0, 7.0.0.0, and so on.

Submission: After writing answer into this word document, Student need to change name to his ID followed by practical number. Ex 20ce005_Pr1.docx. Upload on assignment segment.

Rubrics: Nicely drafted document with clarity in answers leads to full marks. Otherwise, submission carries proportional mark.

Recommended to type, avoid copy-past to increase your typing skill.

Scenario 1: Let's assume that there are three PCs in network. All are connected with layer 2 device switch. All are assigned with the shown IP Addresses in the figure 4.1. All ARP tables are empty. Now, PC0 wants to send some data to PC2. How communication will do?

Figure 4.1 Scenario 1

Conclusion: The sender is a host and wants to send a packet to another host on the same network.

- Uses ARP to find another host's physical address

Handbook of Digital Forensics of Multimedia

Data and Devices, Enhanced E-Book Anthony T. S. Ho, Shujun Li, 2016-05-20 Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever more apparent. Digital forensics involves investigating computer systems and digital artefacts in general while multimedia forensics is a sub topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics bringing two closely related fields of forensic expertise together to identify and understand the current state of the art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification and image forgery detection among many others. Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices. Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices. Offers not only explanations of techniques but also real world and simulated case studies to illustrate how digital and multimedia forensics techniques work. Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies. **A**

A Practical Guide to Emergency Telehealth Neal Sikka, 2021-11-05 A Practical Guide to Emergency Telehealth is the most thorough up to date and practical guidebook available for the design and implementation of a wide variety of acute and episodic distance based clinical services. P2P Networking and Applications John Buford, Heather Yu, Eng Keong Lua, 2009-03-11 Peer to Peer P2P networks enable users to directly share digital content such as audio, video and text files as well as real time data such as telephony traffic with other users without depending on a central server. Although originally popularized by unlicensed online music services such as Napster, P2P networking has recently emerged as a viable multimillion dollar business model for the distribution of information, telecommunications and social networking. Written at an accessible level for any reader familiar with fundamental Internet protocols, the book explains the conceptual operations and architecture underlying basic P2P systems using well known commercial systems as models and also provides the means to improve upon these models with innovations that will better performance, security and flexibility. Peer to Peer Networking and Applications is thus both a valuable starting point and an important reference to those practitioners employed by any of the 200 companies with approximately 400 million invested in this new and lucrative technology. Uses well known commercial P2P systems as models.

thus demonstrating real world applicability Discusses how current research trends in wireless networking high def content DRM etc will intersect with P2P allowing readers to account for future developments in their designs Provides online access to the Overlay Weaver P2P emulator an open source tool that supports a number of peer to peer applications with which readers can practice
