The Cybernetic Society Amir Husain, 2025-08-05 An optimistic shimmering image of a world where AI operates in service to humankind Kirkus argues that both the major risk and opportunity of AI is that humans and computers have fused giving AI the ability to shape the future of human affairs Artificial intelligence is inescapable at home at work in politics and on the battlefield In *The Cybernetic Society* technologist Amir Husain argues that AI hasn't simply encroached on everything we do It has become part of us and we it Humans and intelligent machines he argues are enmeshed in a symbiotic hybrid that he calls a cybernetic society Husain describes a present and future where AI isn't a tool of humans but our equal partner one where they can realize their own visions of the world There is great potential and danger Saudi Arabia's Neom a cognitive city being built in inhospitable desert shows how this symbiosis can make life possible where otherwise it is not But the profusion of intelligent military drones is making mass destruction possible where otherwise it is not As engrossing as it is urgent *The Cybernetic Society* offers a new understanding of this revolutionary fusion of machine and mankind and its profound implications for all our futures The path ahead is challenging But Husain shows why we can live harmoniously with our creations
