Computers in Swedish Society Per Lundin, 2012-05-02 This book reviews the shift in the historiography of computing from inventors and innovations to a user perspective and examines how the relevant sources can be created collected preserved and disseminated The text describes and evaluates a project in Sweden that documented the stories of around 700 people The book also provides a critical discussion on the interpretation of oral evidence presenting three case studies on how this evidence can inform us about the interaction of computing with large scale transformations in economies cultures and societies Features describes a historiography aimed at addressing the question of how computing shaped and transformed Swedish society between 1950 and 1980 presents a user centered perspective on the history of computing after explaining the benefits of such an approach examines the documentation of users describing novel and innovative documentation methods discusses the pros and cons of collaborative projects between academia and industry [History of Nordic Computing 4](#) Christian Gram, Per Rasmussen, Søren Duus Østergaard, 2015-05-05 This book constitutes the refereed post proceedings of the 4th IFIP WG 9.7 Conference on the History of Nordic Computing HiNC 4 held in Copenhagen Denmark in August 2014 The 37 revised full papers were carefully reviewed and selected for inclusion in this volume The papers focus on innovative ICT milestones that transformed the nordic societies and on the new ideas systems and solutions that helped creating the welfare societies of today in particular solutions and systems for public services e.g. tax social benefits health care and education solutions and systems for the infrastructure of the society e.g. banking insurance telephones transport and energy supply and technologies and IT policies behind the major IT milestones e.g. user centric innovation programming techniques and IT ethics They are organized in topical sections on IT policy infrastructure public services private services telesystems health care IT in banking transport and IT technology [Milestones in Analog and Digital Computing](#) Herbert Bruderer, 2021-01-04 This Third Edition is the first English language edition of the award winning *Meilensteine der Rechentechnik* illustrated in full color throughout in two volumes The Third Edition is devoted to both analog and digital computing devices as well as the world's most magnificent historical automata and select scientific instruments employed in astronomy surveying time measurement etc It also features detailed instructions for analog and digital mechanical calculating machines and instruments and is the only such historical book with comprehensive technical glossaries of terms not found in print or in online dictionaries The book also includes a very extensive bibliography based on the literature of numerous countries around the world Meticulously researched the author conducted a worldwide survey of science technology and art museums with their main holdings of analog and digital calculating and computing machines and devices historical automata and selected scientific instruments in order to describe a broad range of masterful technical achievements Also covering the history of mathematics and computer science this work documents the cultural heritage of technology as well *Building Blocks of Society* James W. Cortada, 2020-11-25 The history of information is a rapidly

emerging new subfield of history Historians are identifying the issues they need to examine crafting novel research agendas and locating research materials relevant to their work Like the larger world around them historians are discovering what it means to live and work in a world that increasingly sees itself as an information society Long a discussion point among sociologists economists political leaders and media experts historians are integrating their methods and research into the larger conversation This book proposes a way to look at the history of information and to history as a whole that is simultaneously relevant to observers in other disciplines and familiar to historians of business economics sociology and technology The author presents that advocacy in two ways with theoretical and historiographical discussions of what information ecosystems and infrastructures are and their value for this kind of research second through a range of case studies applying those concepts The wide range of case studies is purposeful in demonstrating the applicability of the ideas presented in the early methodological chapters Themes mentioned in each of the early chapters are consistently applied in all subsequent chapters This book breaks from the more traditional historiography of book history sociological and philosophical discussions about knowledge and society The first two chapters focus on the craft of the historian in this new field better known as historiography and methods Subsequent chapters are case studies showing what results when a historian writes about ecosystems and infrastructures moving our discussion from theory to practice The book is an important and substantive contribution to this new subfield an essential primer as well as a major statement for all historians on how next to evolve their craft

International Communities of Invention and Innovation Arthur Tatnall, Christopher Leslie, 2016-11-30 This book contains revised selected papers presented at the IFIP WG 9.7 International Conference on the History of Computing HC 2016 held in Brooklyn NY USA in May 2016 The 13 full papers included in this volume were carefully reviewed and selected from numerous submissions The papers cover a wide range of topics related to the history of computing and focus on the history of pre existing relationships and communities that led to triumphs and dead ends in the history of computing This broad perspective helps to tell a more accurate story of important developments like the Internet and provide a better understanding of how to sponsor future invention and innovation They reflect on histories that foreground the international community along four broad themes invention policy infrastructure and social history

A Contemporary Historiography of Economics Till D ppe, E. Roy Weintraub, 2018-10-03 In recent years the focus of historians of economic thought has changed to also include the ideas and practices of contemporary economists This has opened up new questions regarding the utilization of sources choice of method narrative styles and ethical issues as well as a new awareness of the historian's place role and task This book brings together leading contributors to provide for the first time a methodological overview of the historiography of economics Emphasising the quality of the scholarship of recent decades the book seeks to provide research tools for future historians of economic thought as well as to any historians of social science with an interest in historiographic issues

History of Nordic Computing Janis Bubenko, John Impagliazzo, Arne Soelvig, 2005-01-14

Computing in the Nordic countries started in late 1940s mainly as an engineering activity to build computing devices to perform mathematical calculations and assist mathematicians and engineers in scientific problem solving The early computers of the Nordic countries emerged during the 1950s and had names like BARK BESK DASK SMIL SARA ESKO and NUSSE Each of them became a nucleus in institutes and centres for mathematical computations programmed and used by highly qualified professionals However one should not forget the punched card machine technology at this time that had existed for several decades In addition we have a Nordic name namely Frederik Rosing Bull contributing to the fundamentals of punched card technology and forming the French company Bull Commercial products such as FACIT EDB and SAAB D20 series computers in Sweden the Danish GIER computer the Nokia MIKKO computer in Finland as well as the computers of Norsk Data in Norway followed the early computers In many cases however companies and institutions did not further develop or exploit Nordic computing hardware even though it exhibited technical advantages Consequently in the 1970s US computers primarily from IBM flooded the Nordic market

Exploring the Early Digital Thomas Haigh, 2019 Changes in the present challenge us to reinterpret the past but historians have not yet come to grips with the convergence of computing media and communications technology Today these things are inextricably intertwined in technologies such as the smartphone and internet in convergent industries and in social practices Yet they remain three distinct historical subfields tilted by different groups of scholars using different tools We often call this conglomeration the digital recognizing its deep connection to the technology of digital computing Unfortunately interdisciplinary studies of digital practices digital methods or digital humanities have rarely been informed by deep engagement with the history of computing Contributors to this volume have come together to reexamine an apparently familiar era in the history of computing through new lenses exploring early digital computing and engineering practice as digital phenomena rather than as engines of mathematics and logic Most focus on the period 1945 to 1960 the era in which the first electronic digital computers were created and the computer industry began to develop Because digitality is first and foremost a way of reading objects and encoding information within them we are foregrounding topics that have until now been viewed as peripheral in the history of computing betting odds calculators card file systems program and data storage programmable calculators and digital circuit design practices Reconceptualizing the history of computing as study of the early digital decenters the stored program computer repositioning it as one of many digital technologies

History of Nordic Computing 2 John Impagliazzo, Timo Järvi, Petri Paju, 2009-09-19 The First Conference on the History of Nordic Computing HiNC1 was organized in Trondheim in June 2003 The HiNC1 event focused on the early years of computing that is the years from the 1940s through the 1960s although it formally extended to year 1985 In the preface of the proceedings of HiNC1 Janis Bubenko Jr John Impagliazzo and Arne S

lvberg describe well the peculiarities of early Nordic computing 1 While developing hardware was a necessity for the first professionals quite soon the computer became an industrial product Computer scientists among others grew increasingly interested in programming and application software Progress in these areas from the 1960s to the 1980s was experienced as astonishing The developments during these decades were taken as the focus of HiNC2 During those decades computers arrived to every branch of large and medium sized businesses and the users of the computer systems were no longer only computer specialists but also people with other main duties Compared to the early years of computing before 1960 where the number of computer projects and applications was small capturing a holistic view of the history between the 1960s and the 1980s is considerably more difficult The HiNC2 conference attempted to help in this endeavor *The Origins of Digital Computers* B Randell,1973-12-11 **The Early History of Computing** Garry J. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Computers In Swedish Society Documenting Early Use And Trends History Of Computing : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
