
International Business Machines Corporation Case Report Essay

Introduction

International Business Machines Corporation (IBM) refers to a public-oriented company currently based in Armonk region in New York, United States. Some of the primary operations carried out by IBM is global financing, system hardware and software, international business services (GBS) and global technology services (GTS). IBM also has a consulting firm currently offering and operating in most countries across the globe. IBM is among the greatest academic giants available around the world, offering computer technology and other related services to more than 170 countries globally. IBM is among the companies listed in the A&P companies with the highest revenue profit (Fortune US 2015). IBM is also among the companies currently registered for trading in New York Stock Exchange Market (NYSE) (Adams, 2014). The report consolidates the inventory valuation and its effect on reported results. The paper focuses on identifying asset valuation technique, shareholder equity and liabilities for International Business Management.

As stated earlier, IBM is among the leading companies offering technological support globally, as an established company, it is essential to establish a detailed financial analysis for the company through inspection of the company's compliance and internal controls to Sarbanes. Therefore, the economic analysis will incorporate aspects such as vertical, horizontal, and ratios financial statement analysis. The ratios being analyzed include liquidity ratios, efficiency ratios, debt ratios and profit ratios.

Accounting Policies

Accounting principle acceptable by the United States laws accounts for financial statements being prepared by the International Business Machine Corporation (IBM). IBM ensures financial statements are designed for all its controlled subsidiaries. All estimates are made following the company's assumptions and knowledge. The company provides all the necessary information is contained in the financial statement by thoroughly considering the set guidelines and rules.

Shareholders' Equity, Liabilities and Accounting Assets

In assets accounting, the company is responsible for making the necessary acquisition by considering the value of acquired assets. Any operation and other liabilities assumed within the acquirer are expected to equip with the accounting information recorded in the book. Consequently, the financial assets are measured by considering a fair value carried out systematically. When accounting for the company's liabilities, the appropriate valuation method is adopted in such cases within each accounting period through a systematic process ((Adams, 2014). When considering aspects such as receivables and long-term loans, the fair value is based on discounted future cash flow by considering the interest rates charged for clients and similar loans. There fore, liabilities and short-term assets all have approximated fair value. The company maintains a defined hierarchy of level 1, level 2 and level three, which ensure all its financial instruments maintained a fair value hierarchy.
