

## Unit D: Electrical Principles and Technologies

### Science 9 Review

Wherever necessary, answer questions on a separate sheet of paper.

- With electrical technology all around us, it is usually our own responsibility to be safe around electricity. For example, you should always be careful to stay clear of power lines.

Describe two other behaviours that minimize risk when dealing with electricity. Explain how the behaviours keep you safer around electricity.

- Metals can be coated using the process of electroplating. Sketch an electroplating cell that is used to place a coating of nickel onto an iron bar. Label the following in your sketch.

- electricity source
- positive and negative electrodes
- electrolyte
- direction of electron flow
- movement of metal atoms

- Use the space below to draw two circuit diagrams. Each circuit should have a three-cell battery, and three bulbs and a motor. In the first diagram, connect each bulb and the motor in series. In the second diagram, connect each bulb and the motor in parallel.

- Electrical circuits are in many of the devices that we use every day. What features are included in the electrical circuits of the devices to make them more convenient?
