Conducting Child Custody Evaluations From Basic To Complex Issues:

Conducting Child Custody Evaluations Philip M. Stahl, 2011 Addresses key topics such as the best interests of the child custody and time share divorce and its impact on children and children's developmental needs

Conducting Child Custody Evaluations Philip M. Stahl, 1994-08-15 This important contribution to understanding the whole process of conducting child custody evaluation based on the author's extensive experience examines in detail the complex questions and issues involved. The many topics addressed include interviewing parents and children testifying in court writing custody evaluations assessing the capacity to parent assessing the attachment of children to their parents planning custody and parental access children's adjustment to divorce domestic violence drug and alcohol abuse mental illness parental alienation and on going evaluation

Conducting Child Custody Evaluations Philip Michael Stahl, 2011 This work is a combination of two previously published books *Conducting Child Custody Evaluations* and *Complex Issues in Child Custody Evaluations*. The book was written as a guide to help students and practitioners walk through the process of conducting a child custody evaluation a critical skill for mental health practitioners

Complex Issues in Child Custody Evaluations Philip M. Stahl, 1999-05-21 This text is excellent and very timely. Philip Michael Stahl's second volume is the perfect supplement to his *Conducting Child Custody Evaluations* because it deals with specific issues of great concern to evaluators: parental alienation, allegations of sexual abuse, domestic violence, move away situations, and high conflict families. The chapter dealing with child considerations is also very well done. His discussion of developmental considerations is clear and supported by the latest research in the field. I also liked his treatment of children's reaction to parental conflict, weighing the needs of the individual child with the needs of the sibling group, and giving the child a voice while protecting their privacy. I also appreciated his discussion of components of the evaluator's recommendation, use of psychological testing, Rosemary Vasquez's discussion of cultural issues, tackling the terror of testifying, and ethical issues. Phil Stahl has written a very important text. It is timely, well written, and comprehensive. Nice work, Hugh McIsaac, Oregon Family Institute. When performing a custody evaluation, how do professionals deal with the issue of domestic violence? What impact does one parent's moving away have on the evaluation? How should an evaluator handle high conflict divorces? Over the past five to ten years, there has been a significant increase in the use of child custody evaluations by the courts. At the same time, the issues have become more complex and difficult. In this book, the author provides a theoretical and practical understanding of many of the factors that make custody evaluations complex. A key component is the integration of disparate research findings into a comprehensive resource that will enable the evaluator and the court to understand these complex issues. A second component is to provide a thorough understanding of the fact that divorce brings with it a set of complex needs, and evaluators and the courts must develop a paradigm for weighing these needs in a comprehensive manner. This book provides that paradigm.

Conducting Scientifically Crafted Child Custody Evaluations Jonathan W. Gould, 1998-05-20. In *Conducting Scientifically Crafted Child Custody Evaluations*, author Jonathan W. Gould compiles the literature on child custody evaluation into a coherent, logically integrated format that can be applied directly to practice. This empirically based book represents state-of-the-art forensic techniques in the rapidly changing field of child custody evaluation. Gould challenges this dynamic field to further advance by enhancing its level of professionalism and strengthening its scientific basis. Currently, only 10% of divorcing couples with children pursue resolution of custody disputes. The author questions whether this minority comprises a unique population that requires separate, uniquely developed intervention protocols. He asks: If the people who request forensic child custody evaluation comprise a unique population, how useful are our assessment tools when they have not been validated on this distinctive group? Proposing new assessment models that are in fact based on studies with this population, Gould emphasizes that this is one of the fastest growing areas of professional involvement for practicing psychologists, counselors and social workers. Divided into three parts, the book covers a conceptual framework, the evaluation process and suggestions for the
