

Narrative Inquiry: a relational methodology Clandinin & Connelly

What is a narrative?

A narrative is retelling an event in a sequence of written or spoken words. The narrative is not the story itself but rather the telling of the story. While a story is a sequence of events, a narrative recounts those events, and depending on the audience, the narrator may leave some events out as they are, from their perspective, insignificant, and involve highlighting others. This is what Narrative Inquiry explores—the essence of the personal experience from the event.

Narrative sequence—Cardiac Arrest

Normality—life as “normal”—partner, work and social communities.

Event— a Cardiac Arrest (CA) interrupts normal life, introduction to hospital, health professionals, medication, and realization of closeness to death.

Return back to a New Normal life—possible same as before CA, but different.

Narrative is a way for people to express themselves and find meaning and coherence in a new reality.

Past experiences

Where the narrative was experienced

Relationship with people during the event

Sociality
“why”

Spatiality
“where”

Temporality
“when”

Relationship with the people who listen to the narrative

Where the story is told

Present time

Narrative Stories

Implications for the future

Participant

Emotional relationship

Researcher

Antecedents—feelings, hope, moral dispositions
Outcome—the emotional relationship, the narrative event

Narrative presentation of findings

Narrative Inquiry Colette Daiute, 2013-10-17 Narrative Inquiry provides both a new theoretical orientation and a set of practical techniques that students and experienced researchers can use to conduct narrative research. Explaining the principles of what she terms dynamic narrating, author Colette Daiute provides an approach to narrative inquiry that builds on practices of daily life where we use storytelling to connect with other people. Dealing with social structures, make sense of surrounding events and craft our own way of fitting in with various contexts. Throughout the book, Daiute illustrates and applies narrative inquiry with a wide variety of examples, practical activities, charts, suggestions for interpreting analyses, and tips on writing up results. Narrative Inquiry integrates cultural historical activity, discourse theories, including critical discourse theory and conversation analysis, and interdisciplinary research on narrative as applied to a range of research projects in different cultural settings.

Pedagogies of Kindness and Respect Paul Lee Thomas, 2015 *Pedagogies of Kindness and Respect* presents a wide variety of concepts from scholars and practitioners who discuss pedagogies of kindness as an alternative to the 'no excuses' ideology now dominating the way that children are raised and educated in the U.S. today. The fields of education and especially early childhood education include some histories and perspectives that treat those who are younger with kindness and respect. This book demonstrates an informed awareness of this history and the ways that old and new ideas can counter current conditions that are harmful to both those who are younger and those who are older while avoiding the reconstitution of the romantic innocent child who needs to be saved by more advanced adults. Two interpretations of the upbringing of children are investigated and challenged: one suggesting that the poor do not know how to raise their children and thus need help, while the other looks at those who are privileged and therefore know how to nurture their young. These opposing views have been discussed and problematized for more than thirty years. *Pedagogies of Kindness and Respect* investigates the issue of why this circumstance has continued and even worsened today.

A Catalogue of a Unique ... Collection of Upwards of Twenty-six Thousand Ancient and Modern Tracts and Pamphlets. Collected and Arranged by J. R. Smith John Russell Smith, 1874

Learning Science: Theory, Research, and Practice Robert S. Feldman, 2019-08-09 Cutting edge insights and perspectives from today's leading minds in the field of learning science. The discipline of learning science is fast becoming a primary approach for answering one of the most important questions of our time: How do we most effectively educate students to reach their full potential? Spanning the disciplines of psychology, data science, cognitive science, sociology, and anthropology, Learning Science offers solutions to our most urgent educational challenges. Composed of insightful essays from top figures in their respective fields, the book also shows how a thorough understanding of this critical discipline all but ensures better decision making when it comes to education. Chapters include: Exploring Student Interactions in Collaborative Problem Solving with a Multimodal Approach; Learning Science Research
