the Kingdom of the Netherlands in 1954 education was essentially shaped by the different religious denominations on the island Over time St Maarten's schooling system developed from an almost non existing entity to a well structured one which closely resembled the educational framework in the Netherlands its former colonial ruler Part two reflects the respondents reactions to several issues concerning education in St Maarten It was only after local St Maarten students became teachers that topics about the island found their place in the curriculum Even though it took some time to integrate St Maarten in the curriculum the people did not and still do not have the feeling that education has let them down It is only now that they are beginning to question whether and to what extent schools were and are able to positively influence young people In the past they believed that schooling however foreign its curriculum may have been did actually help them to find a niche in the world After studying both written and oral sources the book concludes that the coat of arms of St Maarten is representative of its findings about education on this island Semper progrediens Always progressing Education in St Maarten has progressed without showing radical breaks    **Low-cost Housing in Barbados** Mark R.
