## **Carlo Scarpa Architect Intervening With History:**

**Carlo Scarpa, Architect** Carlo Scarpa, R. Nicholas Olsberg, 1999 Between 1953 and 1978 the Italian architect Carlo Scarpa produced an incredibly varied range of works that challenge our notions of what modern architecture might be. Foremost in that work was the need to reconcile a wholehearted embrace of the new with the longstanding traditions of local craft and of universal practice to create an architecture that would clearly express its own machine-driven times without abandoning the psychic and sensual forces of place, materiality and memory. Carlo Scarpa Architect Intervening with History illustrates through abundant reproductions of Scarpa's drawings the ways the architect created a dialogue with light, space and architecture within the historic fabric of Italian cities. Presenting these projects as they exist today, the patient eye of contemporary photographer Guido Guidi deepens our understanding of this timely approach to architectural dialogue.

**Carlo Scarpa Architect: Intervening with History**, 1999 [Encyclopedia of Twentieth Century Architecture](#) R. Stephen Sennott, 2004 For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopedia of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism. Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles and building practices across traditional geographic and cultural boundaries.

**Suspending Modernity: The Architecture of Franco Albini** Kay Bea Jones, 2016-04-01 Franco Albini's works of architecture and design produced between 1930 and 1977 have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement. A chorus of Italian voices has sung his praises none more eloquently than his protégé Renzo Piano. Kay Bea Jones' illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design. Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design. He collaborated for over 25 years with Franca Helg and at a time when professional male/female partnerships were virtually unknown. His museums and installation motifs changed the way Italians displayed historic artifacts. He composed novel suspension structures for dwellings, shops, galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects. Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space. His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities. He explored new fabrication technologies from the scale of furniture to wide-span steel structures yet he never abandoned the rigors of craft and detail in favor of mass production. *Suspending Modernity* follows the evolution of Albini's most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition. Jones argues here that Albini's masterful use of materials and

architectural expression mark an epic paradigm shift in the modern period      Adaptive Reuse of the Built Heritage Bie Plevoets, Koenraad Van Cleempoel, 2019-04-18 Adaptive reuse the process of repairing and restoring existing buildings for new or continued use is becoming an essential part of architectural practice As mounting demographic economic and ecological challenges limit opportunities for new construction architects increasingly focus on transforming and adapting existing buildings This book introduces adaptive reuse as a new discipline It provides students and professionals with the understanding and the tools they need to develop innovative and creative approaches helping them to rethink and redesign existing buildings a skill which is becoming more and more important Part I outlines the history of adaptive reuse and explains the concepts and methods that lie behind new design processes and contemporary practice Part II consists of a wide range of case studies representing different time periods and strategies for intervention Iconic adaptive reuse projects such as the Caixa Forum in Madrid and the Rijksmuseum in Amsterdam are discussed alongside less famous and spontaneous transformations such as the Kunsthaus Tacheles in Berlin in addition to projects from Italy Spain Croatia Belgium Poland and the USA Featuring over 100 high quality color illustrations Adaptive Reuse of the Built Heritage is essential reading for students and professionals in architecture interior design heritage conservation and urban planning      *Modern Architectural Theory* Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism      *The Architecture of Modern Italy* Terry Kirk, 2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter s all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the

landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself

**Key Modern Architects** Andrew Higgott, 2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect's work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect's working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect's most significant projects along with suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a critical approach Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history

*Materials* Oscar Riera Ojeda, 2003 This new series examines the role of details in contemporary architecture through the work of many emerging and established practitioners whose designs speak sensitively and energetically at the small scale The collection presents these details in photographs accompanied by working drawings sketches an introductory essay and captions that explain how the elements were conceived and built The details presented are often beautiful telltales of a designer's thoughts scaled to our eye made physical to the touch of our hand These crafted moments remind us that architecture can be a subtle and powerful force played out in some cases by evoking historical motifs in others by radical experimentation with new materials But more than a simple catalogue of ideas these details are ultimately shown as individual expressions of discovery gestures of delight or severity of beauty and clarity They are meaningful indications of the architect's presence more than all else willful signs that the true craft of design is alive and well Materialsexamines a wide spectrum of architectural palettes from traditional materials used in innovative ways to the testing of new substances that alter the meaning of historic forms The

images demonstrate the use of single materials throughout a space as well as the joining of multiple components in one place. These details exemplify projects in which patterns, textures, color, and surface qualities contribute ingeniously to the character of the architecture around them.

Design & Historic Preservation David L. Ames, Richard D. Wagner, 2009. This collection of papers addresses two questions central to design and historic preservation: what are the parameters of compatibility in the design of additions to historic buildings and of new infill buildings in historic districts and landscapes. Presented at the Third National Forum on Historic Preservation Practice: A Critical Look at Design in Historic Preservation held at Goucher College. The authors include practicing and academic historic preservationists, architectural historians, architects, landscape architects, and engineers. Organized under the themes of Melding Contemporary and Historic Design, Design Standards in Changing Environments, Modernism and Postmodernism in Preservation Design, and Engineering and Preservation issues of compatibility are explored through diverse projects in locations across the United States from historic Charleston, SC to downtown Los Angeles.

Architectural Record, 1999      Architectural Publications Index, 2000      **The Canadian Architect**, 1999      Architecture, 1999      *The Architects' Journal*, 1999-07      **Strange Details** Mike Cadwell, 2007. Looks at the work of four canonical architects who made strange with the most resistant aspect of architecture: construction. This title explores the strangeness in the material menagerie of Scarpa's Querini Stampalia, the wood light frame construction of Wright's Jacobs House, the welded steel frame of Mies Farnsworth House, and more.

**Interiors**, 1999-04      *The Surface of Meaning* Robert Bringhurst, 2008. The design and manufacture of books can tell as much about a people or a culture as the ambience of its streets and the architecture of its buildings. In our everyday lives, books surround us even if we are among the many who never read another one after high school. Their very jacket design asks us to make meaning of their presence and when we open them, the layout of words and stories within their covers makes us readers even before we begin to read. To Robert Bringhurst, typographer, poet, and writer, the presence of books and the story of books in Canada are preludes to understanding our culture. From the tattered book of Canadian poetry your moody cousin carried everywhere to the pristine hardcover book of Atwood's latest work in your brainy co-worker's hands, book design says much about who and where we are as Canadians. In *The Surface of Meaning*, Robert Bringhurst takes us on another of his walking tours, this time through the bramble of English and French Canadian books and book design from the mid 18th Century to the present day. Along the way, he discovers a true image trove of identity, culture, and history. And he does what no other work on books and publications does: He creates a truly national survey of Canadian books by bringing Canada's long history of Aboriginal story telling into a context of book. It is a context that goes into the depths of our prehistory far beyond the printed page. *The Surface of Meaning* is a tribute to Canadian books and publishing. It is irresistible to readers who love books as well as to designers and others who may simply prefer to look at them.
