**Romanticism and Marxism** Marcus Paul Bullock, 1987 Interest in Walter Benjamin's extraordinarily subtle imaginative use of the materialist view of history has grown strongly in recent years His interpretations of the changes in culture brought about by technological media of representation reproduction and dissemination and the intricate connections he explores between politics and the phenomena of literature and the arts continue to be among the richest sources of thought we have on these questions This book shows the relationship between his work and that of Friedrich Schlegel whose ideas were the foundation of the European Romantic movement and in many ways the basis of modern literary study The scope of this investigation extends to such diverse phenomena in our century as surrealism and the philosophical contradictions of modern physics

*The Radical Left and Social Transformation* Robert Latham, Karen Bridget Murray, Julian von Bargen, A.T. Kingsmith, 2020-05-21 This comprehensive collection draws upon and reengages with a long history of Marxian anchored thought to analyze the potential for social transformation through a reinvigorated radical Left all within the context of the ascendance of an increasingly ethnonationalist patriarchal and authoritarian far Right worldwide The authors identify and reflect on strategies tactics and possibilities for analyzing and intervening in advanced capitalist societies by increasing and deepening popular participation and support on the far Left The chapters are framed in terms of conceptualizing the capitalist present organizing the people and reimagining the radical Left Together in diverse ways that draw upon both

qualitative and quantitative approaches the authors evaluate the difficulties of augmentation across multiple planes from the tension between migrants and citizen workers to the uneasy relationship between sovereignty and class to the contradictions operating across international versus domestic dynamics How and why if at all should the radical Left reexamine its understanding of political consciousness identity ideology and institutions as they relate to Marxian analysis and various threads of critical theory The authors suggest new approaches for understanding what the radical Left is up against and how problematic barriers might be torn down thus disrupting unhelpful binaries such as state versus capital national versus international worker versus migrant activist versus candidate and freedom versus necessity This book was originally published as a special issue of the online journal Global Discourse
