## Novel Cli Fi Novel:

Cli-fi Axel Goodbody, Adeline Johns-Putra, 2018 Proto Climate Change Fiction Speculative future fiction dystopian and post apocalyptic narratives Realist narratives set in the present and near future Thriller crime conspiracy social satire Children s film and young adult novels Literary modernism Notes on Contributors *Climate Fiction and Cultural Analysis* Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term s descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term s speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally Posthumanist Readings in Dystopian Young Adult Fiction Jennifer Harrison, 2019-04-29 If there is one trend in children s and YA literature that seems to be enjoying a steady rise in popularity it is the expansion of the YA dystopian genre While the genre has been lauded for its potential to expand horizons promote critical thinking and foster social awareness and activism it has also come under scrutiny for its promotion of specific ideologies and its often sensationalist approach to real world problems In an examination of six YA dystopian texts spanning more than twenty years of development of the genre this book explores the way in which posthumanist ideologies in particular are deployed or resisted in these texts as a means of making sense of the specific challenges which young people confront in the twenty first century *Fiction and the Sixth Mass Extinction* Jonathan Elmore, 2020-04-01 Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction s engagements with human driven extinction Drawing together a diverse group of scholars and approaches this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli fi with texts and media typically not associated with Anthropocene fictions The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction This volume takes up the collective insistence on the centrality of story to extinction

studies In various and disparate ways each chapter engages with the stories we tell about extinction about the extinction of animal and plant life and about the extinction of human life itself Answering the call to action of extinction studies these chapters explore what kinds of humanity caused this event and what kinds may live through it what cultural assumptions and values led to this event and which ones could lead out of it what relationships between human life and this planet allowed the sixth mass extinction and what alternative relationships could be possible *The Ecology of American Noir* Katrina Younes,2025-04-07 This volume investigates the relationship between the conventions of noir fiction and film and its sub types in relation to environmental crises Dr Younes addresses questions that not only allow readers to re read early hardboiled literature and neo noir films but also help identify a new sub genre of noir and develop an ecocritical methodology eco noir This text traces the development of strategies of mapping urban blight and environmental deterioration in classic hardboiled fiction of the 1940s neo noir films of the 1970s and eco noir texts of the post millennial period Introducing the concept of eco noir as both a sub genre and fictional form as well as a methodology the volume develops a new way of understanding the relationship between noir and climate fiction texts Through a close reading of hardboiled neo noir and eco noir texts including those by Dashiell Hammett Raymond Chandler Robert Towne Kim Stanley Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of noir map the noir atmosphere of the private investigator s natural setting in terms of environmental toxicity The Ecology of American Noir contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment *Science Fiction and Climate Change* Andrew Milner,J. R. Burgmann,2020 This is a timely comprehensive and thoroughly researched study of climate fiction from around the world including novels short stories films and other formats Informed by a sociological perspective it will be an invaluable resource for students and scholars looking to enter and expand the field of climate fiction studies *Visions of the Wasteland in "Maze Runner". The Scorch Trials as Climate Fiction* Sara Bauer,2023-12-08 Seminar paper from the year 2023 in the subject English Language and Literature Studies Literature grade 1 0 Humboldt University of Berlin Anglistik Amerikanistik course Genre Fiction language English abstract This seminar paper will deep dive into the origins of climate fiction and the imagery used in the novel as well as compare it to current realities to unveil how The Scorch Trials serves as an allegory of the pressing issues of climate change and a possible future we might face and why it can be categorized as cli fi Is climate fiction merely a subgenre of science fiction or could we already classify it as a genre of its own How do we understand the cultural context of such narratives and what realities do climate fiction draw from A link to James Dasher s novel Maze Runner The Scorch Trials is to be made by looking into dystopian narratives and current pressing climate issues portrayed in The Maze Runner Scorch Trials through climate fiction narration **Teaching Climate Change to Adolescents** Richard Beach,Jeff

out of many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways SSPs. The setting is the year 2054 during the Conference of the Parties global climate negotiations aka The COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic, and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road, or abandoned altogether. From harrowing to hopeful, these stories highlight the choices we must make to stabilize the planet. Our Shared Storm is an experiment in deploying practice-based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.

*Ecology & Environment Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 3rd Edition* Disha Experts, *The Noah Myth in Twenty-First-Century Cli-Fi Novels* Helen E. Mundler, 2022. With the rise of concern about global warming in recent years, climate change fiction or cli-fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli-fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, *Margaret Atwood's Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns-Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene.
