Deep Neural Networks and Data for Automated Driving Tim Fingscheidt, Hanno Gottschalk, Sebastian Houben, 2022-07-19 This open access book brings together the latest developments from industry and research on automated driving and artificial intelligence Environment perception for highly automated driving heavily employs deep neural networks facing many challenges How much data do we need for training and testing How to use synthetic data to save labeling costs for training How do we increase robustness and decrease memory usage For inevitably poor conditions How do we know that the network is uncertain about its decisions Can we understand a bit more about what actually happens inside neural networks This leads to a very practical problem particularly for DNNs employed in automated driving What are useful validation techniques and how about safety This book unites the views from both academia and industry where computer vision and machine learning meet environment perception for highly automated driving Naturally aspects of data robustness uncertainty quantification and last but not least safety are at the core of it This book is unique In its first part an extended survey of all the relevant aspects is provided The second part contains the detailed technical elaboration of the various questions mentioned above

An Introduction to 3D Computer Vision Techniques and Algorithms Boguslaw Cyganek, J. Paul Siebert, 2011-08-10 Computer vision encompasses the construction of integrated vision systems and the application of vision to problems of real world importance The process of creating 3D models is still rather difficult requiring mechanical measurement of the camera positions or manual alignment of partial 3D views of a scene However using algorithms it is possible to take a collection of stereo pair images of a scene and

then automatically produce a photo realistic geometrically accurate digital 3D model This book provides a comprehensive introduction to the methods theories and algorithms of 3D computer vision Almost every theoretical issue is underpinned with practical implementation or a working algorithm using pseudo code and complete code written in C and MatLab There is the additional clarification of an accompanying website with downloadable software case studies and exercises Organised in three parts Cyganek and Siebert give a brief history of vision research and subsequently present basic low level image processing operations for image matching including a separate chapter on image matching algorithms explain scale space vision as well as space reconstruction and multiview integration demonstrate a variety of practical applications for 3D surface imaging and analysis provide concise appendices on topics such as the basics of projective geometry and tensor calculus for image processing distortion and noise in images plus image warping procedures An Introduction to 3D Computer Vision Algorithms and Techniques is a valuable reference for practitioners and programmers working in 3D computer vision image processing and analysis as well as computer visualisation It would also be of interest to advanced students and researchers in the fields of engineering computer science clinical photography robotics graphics and mathematics

Computer Vision David Forsyth, Jean Ponce, 2003 The accessible presentation of this book gives both a general view of the entire computer vision enterprise and also offers sufficient detail to be able to build useful applications Users learn techniques that have proven to be useful by first hand experience and a wide range of mathematical methods Comprehensive and up to date this book includes essential topics that either reflect practical significance or are of theoretical importance Topics are discussed in substantial and increasing depth Application surveys describe numerous important application areas such as image based rendering and digital libraries Many important algorithms broken down and illustrated in pseudo code Appropriate for use by engineers as a comprehensive reference to the computer vision enterprise **Publications of the National Institute of Standards and Technology ...
