Ways of Being James Bridle,2022-06-21 Artist technologist and philosopher James Bridle s Ways of Being is a brilliant searching exploration of different kinds of intelligence plant animal human artificial and how they transform our understanding of humans place in the cosmos What does it mean to be intelligent Is it something unique to humans or shared with other beings beings of flesh wood stone and silicon The last few years have seen rapid advances in artificial intelligence But rather than a friend or companion AI increasingly appears to be something stranger than we ever imagined an alien invention that threatens to decenter and supplant us At the same time we re only just becoming aware of the other intelligences that have been with us all along even if we ve failed to recognize or acknowledge them These others the animals plants and natural systems that surround us are slowly revealing their complexity agency and knowledge just as the technologies we ve built to sustain ourselves are threatening to cause their extinction and ours What can we learn from them and how can we change ourselves our technologies our societies and our politics to live better and more equitably with one another and the nonhuman world The artist and maverick thinker James Bridle draws on biology and physics computation literature art and philosophy to answer these unsettling questions Startling and bold Ways of Being explores the fascinating strange and multitudinous forms of knowing doing and being that make up the world and that are essential for our survival Includes illustrations

**The Stack** Benjamin H. Bratton,2016-02-26 A comprehensive political and design theory of planetary scale computation proposing that The Stack an accidental megastructure is both a technological apparatus and a

model for a new geopolitical architecture What has planetary scale computation done to our geopolitical realities It takes different forms at different scales from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems from interfaces drawn by the augmentation of the hand and eye to users identified by self quantification and the arrival of legions of sensors algorithms and robots Together how do these distort and deform modern political geographies and produce new territories in their own image In *The Stack* Benjamin Bratton proposes that these different genres of computation smart grids cloud platforms mobile apps smart cities the Internet of Things automation can be seen not as so many species evolving on their own but as forming a coherent whole an accidental megastructure called *The Stack* that is both a computational apparatus and a new governing architecture We are inside *The Stack* and it is inside of us In an account that is both theoretical and technical drawing on political philosophy architectural theory and software studies Bratton explores six layers of *The Stack* Earth Cloud City Address Interface User Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling not only computational forms but also social human and physical forces This model informed by the logic of the multilayered structure of protocol stacks in which network technologies operate within a modular and vertical order offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention *The Stack* is an interdisciplinary design brief for a new geopolitics that works with and for planetary scale computation Interweaving the continental urban and perceptual scales it shows how we can better build dwell within communicate with and govern our worlds thestack.org

**Closing the Loop Around Neural Systems** Steve M Potter, Eberhard E Fetz, Ahmed El Hady, 2014-12-03 Closed loop neurophysiology has been accelerated by recent software and hardware developments and by the emergence of novel tools to control neuronal activity with spatial and temporal precision in which stimuli are delivered in real time based on recordings or behavior Real time stimulation feedback enables a wide range of innovative studies of information processing and plasticity in neuronal networks This Research Topic e Book comprises 16 Original Research Articles seven Methods Articles and seven Reviews Mini Reviews and Perspectives all peer reviewed and published in *Frontiers in Neural Circuits* The contributions deal with closed loop neurophysiology experiments at a variety of levels of neural circuit complexity Some include modeling and theoretical analyses New enabling technologies and techniques are described Novel work is presented from experiments in vitro in vivo and in humans along with their clinical and technological implications for improving the human condition

**Art + Science Now** Stephen Wilson, 2010 *Art Science Now* is a groundbreaking overview of the art being made at the cutting edge of scientific research The first illustrated book in its field it shows how some of the world's most dynamic art is being produced not in museums galleries and studios but in the laboratory where artists probe cultural philosophical and social questions connected with scientific and technological advances Featuring the work of around 250 artists from the UK Germany France the Netherlands the USA Japan and elsewhere it presents a broad range of projects from body art to
