## **Global Empowerment of Educators and Student Learning Through Action Research** Slapac, Alina, Balcerzak,

Phyllis, O'Brien, Kathryn, 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved. The *Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research* explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education.
