**The Repressed Memory Epidemic** Mark

Pendergrast, 2017-10-13 This book offers a comprehensive overview of the concept of repressed memories. It provides a history and context that documents key events that have had an effect on the way that modern psychology and psychotherapy have developed. Chapters provide an overview of how human memory functions and works and examine facets of the misguided theories behind repressed memory. The book also examines the science of the brain the reconstructive nature of human memory and studies of suggestibility. It traces the present day resurgence of a belief in repressed memories in the general public as well as among many clinical psychologists psychiatrists social workers body workers and others who offer counseling. It concludes with legal and professional recommendations and advice for individuals who deal with or have dealt with the psychotherapeutic practice of repressed memory therapy. Topics featured in this text include The modern diagnosis of Dissociative Identity Disorder DID once called MPD The Satanic Panic of the 1980s and its relation to repressed memory therapy The McMartin Preschool Case and the Day Care Sex Panic A historical overview from the Great Witch Craze to Sigmund Freud's theories spanning the 16th to 19th centuries An exploration of the cultural context that produced the repressed memory epidemic of the 1990s The repressed memory movement as a religious sect or cult The Repressed Memory Epidemic will be of interest to researchers and clinicians as well as undergraduate and graduate students in the fields of psychology sociology cultural studies religion and anthropology

**The Link Between Childhood Trauma**

**and Mental Illness** Barbara Everett, Ruth Gallop, 2000-09-21 Each day case managers psychiatric nurses and other mental health professionals interact with adults who have a history of physical and or sexual abuse during childhood. Many of these important professionals will often be the first practitioners to hear about a client's background of abuse but they may not have specialized training in understanding and working with survivors of childhood trauma. *The Link Between Childhood Trauma and Mental Illness* gives mental health professionals who are not child abuse specialists knowledge and skills that are especially relevant to their direct service role and practice context. It introduces to these practitioners a conceptual bridge between biomedical and psychosocial understandings of mental disorder providing a multidimensional approach that allows professionals to think holistically and connect clients abusive pasts with their present day symptoms and behaviors. Building upon this conceptual foundation the book then focuses on direct practice issues including how to ask clients about child abuse the nature of power in the helping relationship the full recovery process effective treatment models client safety issues and ways to listen to client's stories. Also included are valuable insights into helping clients who are in a crisis situation the particular needs of male victims of child abuse racial and cultural considerations and the professional's self care.

Designed to meet the needs of such helping professionals as case managers psychiatric nurses rehabilitation counselors

crisis and housing workers occupational and physical therapists family physicians and social workers The Link Between Childhood Trauma and Mental Illness is an accessible and convenient guide to understanding the effects of childhood abuse and incorporating that understanding into direct practice **Legalizing Misandry** Paul Nathanson,Katherine K. Young,2009-07-15 Paul Nathanson and Katherine Young believe that this reveals a shift in the United States and Canada to a worldview based on ideological feminism which presents all issues from the point of view of women and in the process explicitly or implicitly attacks men as a class They argue that ideological feminism is silently reshaping law public policy education and journalism

**The Quest for the Inner Human** Steven H. Propp,2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that weve all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldnt normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves

**International Handbook of Human Response to Trauma** Arieh Y. Shalev,Rachel Yehuda,Alexander C. McFarlane,2013-11-11 In 1996 representatives from 27 different countries met in Jerusalem to share ideas about traumatic stress and its impact For many this represented the first dialogue that they had ever had with a mental health professional from another country Many of the attendees had themselves been exposed to either personal trauma or traumatizing stories involving their patients and represented countries that were embroiled in conflicts with each other Listening to one another became possible because of the humbling humanity of each participant and the accuracy and objectivity of the data presented Understanding human traumatization had thus become a common denominator binding together all attendees This book tries to capture the spirit of the Jerusalem World Conference on Traumatic

Stress bringing forward the diversities and commonalities of its constructive discourse In trying to structure the various themes that arose it was all too obvious that paradigms of different ways of conceiving of traumatic stress should be addressed first In fact the very idea that psychological trauma can result in mental health symptoms that should be treated has not yet gained universal acceptability Even within medicine and mental health competing approaches about the impact of trauma and the origins of symptoms abound Part I discusses how the current paradigm of traumatic stress disorder developed within the historical social and process contexts It also grapples with some of the difficulties that are presented by this paradigm from anthropologic ethical and scientific perspectives *Accounts of Innocence* Joseph E. Davis, 2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture Accounts of Innocence offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people's lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture Accounts of Innocence will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists *Science Under Siege* Kendrick Frazier, 2023-10-17 For more than thirty years Skeptical Inquirer has steadfastly championed science and reason and has been the leading voice for reliable scientific examination of the paranormal and other questionable claims popularized by the media and mass culture In this collection of outstanding articles editor Kendrick Frazier has selected some of the best writing on topics of current interest Among the highlights are A Skeptical Look at September 11th which prompted a drove of responses many angry and was selected by Richard Dawkins for the Best Science and Nature Writing of 2003 Carl Sagan's final question and answer piece on the topic of science and skeptical inquiry Ann Druyan's beautifully expressed Science Religion Wonder and Awe NASA scientist Stuart Jordan's excellent appraisal of the scientific evidence for global warming which prompted much critical response and led to another follow up article Perspectives by Judge John E Jones III Barbara Forrest David Morrison Massimo Pigliucci and Charles Sullivan and Cameron McPherson Smith on the evolution vs intelligent design controversy Articles by physicians Steven Novella and Richard G Judelsohn that strongly defend the value of vaccinations and critique the anti vaccination movement Additional distinguished contributors include Mario Bunge Martin Gardner Paul Kurtz Chris Mooney Steven Pinker Ray Hyman Joe Nickell and many others This collection of stimulating

articles exploring science and skeptical inquiry examining public controversies and investigating pseudoscientific claims is a must for scientists educators skeptics and everyone concerned about scientific literacy
