Trauma-Informed Forensic Practice Phil Willmot, Lawrence Jones, 2022-03-10 Trauma Informed Forensic Practice argues for placing trauma informed practice and thinking at the heart of forensic services. It is written by forensic practitioners and service users from prison and forensic mental health, youth justice and social care settings. It provides a compassionate theoretical framework for understanding the links between trauma and offending. It also gives practical guidance on working with issues that are particularly associated with a history of trauma in forensic settings such as self harm and substance use, as well as on working with groups who are particularly vulnerable to trauma such as those with intellectual disabilities and military veterans. Finally it considers organisational aspects of delivering trauma informed care not just for service users but for the staff who work in challenging and dangerous forensic environments. The book is the first of its kind to address such a broad range of issues and settings. It is aimed at forensic practitioners who wish to develop their own trauma informed practice or trauma responsive services. It also provides an accessible introduction to trauma informed forensic practice for undergraduate and postgraduate students.

Diagnosing the Psychological Consequences of Trauma Jan Gysi, 2025-09-22 Tremendous progress has been made in the diagnosis and treatment of the consequences of trauma over the past two decades which have led to significant changes being introduced in the ICD 11 and the DSM 5. Navigating this wealth of new knowledge in psychotraumatology as well as keeping track of the various posttraumatic symptoms and disorders that can present in clients can be challenging. The brilliantly structured full color navigation charts in this volume help both early career and experienced professionals to keep track of the variety of diagnostic options to be considered or excluded while not overlooking anything. After an introduction to the trauma dissociation axis model the five axes are then presented in detail including case examples, differential diagnoses, recommendations, decision paths and questionnaires. Axis I: Personality disorders including borderline; Axis II: Disorders specifically associated with stress including PTSD, CPTSD and prolonged grief disorder; Axis III: Structural dissociation of the personality, dissociative and partial dissociative identity disorder; Axis IV: Other dissociative disorders, dissociative neurological symptom disorder, depersonalization, derealization, disorder, dissociative amnesia; Axis V: Comorbid disorders. The last two chapters provide an overview of the special diagnostic aspects of reporting to law enforcement agencies and a catalog of questions collated by the author to help guide diagnosis and inform treatment. This volume is an exceptional resource for psychiatrists, clinical psychologists, psychotherapists and other mental health professionals who work with traumatized individuals.
