Connective Tissue Matrix David W. L. Hukins,1984      Connective Tissue Matrix David W. L. Hukins,1990 A sequel to the volume of the same title published in 1984 The emphasis is on how the structures of connective tissue matrices and changes in those structures are responsible for or influence the many remarkable mechanical properties of the body the development of tissues and the transport of nutrients to and waste products from cells The chapters cover selected topics of current research and are not intended to provide a comprehensive review Some emphasize technique while others concentrate on biological properties Annotation copyrighted by Book News Inc Portland OR      **Connective Tissue Matrix** David W. L. Hukins,1984      Structure-Based Mechanics of Tissues and Organs Ghassan S. Kassab,Michael S. Sacks,2016-01-28 This book portrays the commonality of tissue micro structure that dictates physiological function in various organs microstructure function relation Tissue and organ models are used to illustrate physiological functions based on microstructure Fiber scale properties such as orientation and crimp are described in detail Structurally based constitutive models are given throughout the book not only to avoid ambiguities in material characterization but also to offer insights into the function structure and mechanics of tissue components A statement of future directions of the field is also given including how advancements such as state of the art computational modeling and optical measurements of tissue cells structures are taking structure based modeling to the next level This book also Provides a comprehensive view of tissue modeling across multiple systems Broadens readers understanding of state of the art computational modeling and optical measurements of tissue cells structures Describes in detail fiber scale properties such as orientation and crimp      Collagen Marcel E. Nimni,2018-01-18 This series was conceived with the idea of integrating current aspects of ongoing research in the collagen field The book consists of a spectrum of papers which discuss diverse aspects such as X ray structure the thermodynamics and mechanism of fibrillogenesis and the use of collagen as a biomaterial for the manufacturing of many implantable sometimes lifesaving devices      **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70      Connective Tissue Research ,1989      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1986      Molecular Modeling American Chemical Society. Division of Agricultural and Food Chemistry,1994 Developed from a symposium held at the 205th National Meeting of the ACS in Denver March 1993 to address the issue of molecular modeling from experiment to computation The emphasis is on new approaches for biological and food systems The broad sections include experimental methods for molecular structure prediction of molecular structure analysis at the molecular level for function at system level methods for study of molecular interaction both experimental and computational and recognition of molecular interactions Annotation copyright by Book News Inc Portland OR      **Electromechanical Properties of Normal Cartilage and Biomechanical Regulation of Transplanted Chondrocytes** Albert C.
