Consequences of Corruption at the Sector Level and Implications for Economic Growth and Development

OECD,2015-03-25 This report provides an analysis of the impact of a range of corrupt practices on economic growth and development in four key sectors utilities and infrastructure extractive industries health and education **The impact of corruption on development and economic performance** Daniel Detzer,2010-07-08 Seminar paper from the year 2010 in the subject Business economics Miscellaneous grade 1 0 Berlin School of Economics Global Governance language English abstract During the last decades corruption became an important topic About twenty years ago the issue started to gain increasing attention Different Organization engage in the fight against corruption This is a remarkable change compared to the situation before the 1990s Back then most people did not see it as a pressing problem Actually it was more seen as an integral part of doing business Most European countries allowed for tax deductibility of bribes Even the World Bank not constricted by such national concerns was avoiding the topic The changed perception of corruption has manifold reasons Foremost the geopolitical situation changed remarkably During the cold war governments despite their corruptness were supported to make sure they were not joining the communist bloc After the end of this ideological competition the imperative to tolerate and not to address issues like corruption and abuse of political power ceased to exist Last but not less important the USA not constraint by geopolitical considerations had economic interest to put the topic on the agenda While for US companies bribing abroad was forbidden most other developed countries used graft to initiate business abroad Therefore the US had a special interest to push for anti corruption laws to level the playing field for its companies From a western normative and moral point of view this fight against corruption on the international level seems to be a desirable development However if those were the only reasons for this crusade it could be misperceived as another example of the imposition of rules from the Global North on the Global South Then again if corruption has negative impacts other than moral concerns it would legitimize this movement Prevailing corruption might influence the development and economic performance of a country In today s perception development and economic performance includes a variety of indicators which improve people s quality of life Therefore after having narrowed the definition of corruption as it is understood within this paper the correlation between corruption and some of those indicators will be examined After this basic assessment the relationship between economic growth as one of the indicators for development and corruption shall be illuminated closer The question whether there is a causal relationship and what the channels of this connection are shall be explored

Consequences of Corruption at the Sector Level and Implications for Economic Growth and Development

OCDE,2015 This report provides an analysis of the impact of a range of corrupt practices on economic growth and development in four key sectors utilities and infrastructure extractive industries health and education As quantification of the impact of corruption on economic growth at a macro level remains challenging this report presents evidence at the micro and

sectoral level to capture the various consequences of this phenomenon Prepared by the OECD as a contribution to the G20 efforts to fight corruption this report aims at increasing the understanding of the channels by which corruption inhibits economic growth and assist countries in further integrating anticorruption in their efforts to foster inclusive sustainable growth and development Drawing lessons from the cross cutting analysis the report encourages countries to design comprehensive anti corruption strategies for which progress could be measurable and which would be tailored to specific country circumstances and economies to achieve the best results for economic growth and value for money Corruption and the Global Economy Kimberly Ann Elliott,1997-06-01 The recently adopted OECD convention outlawing bribery of foreign public officials is welcome evidence of how much progress has been made in the battle against corruption The financial crisis in East Asia is an indication of how much remains to be done Corruption is by no means a new issue but it has only recently emerged as a global issue With the end of the Cold War the pace and breadth of the trends toward democratization and international economic integration accelerated and expanded globally Yet corruption could slow or even reverse these trends potentially threatening economic development and political stability in some countries As the global implications of corruption have grown so has the impetus for international action to combat it In addition to efforts in the OECD the Organization of American States the World Trade Organization and the United Nations General Assembly the World Bank and the International Monetary Fund have both begun to emphasize corruption as an impediment to economic development This book includes a chapter by the Chairman of the OECD Working Group on Bribery discussing the evolution of the OECD convention and what is needed to make it effective Other chapters address the causes and consequences of corruption including the impact on investment and growth and the role of multinational corporations in discouraging bribery The final chapter summarizes and also discusses some of the other anticorruption initiatives that either have been or should be adopted by governments multilateral development banks and other international organizations Corruption and Development in African Nations Suma Pothuvaal,2025-01-03 Corruption and Development in African Nations explores the deep rooted causes of corruption in Africa going beyond the typical portrayal of African countries as corrupt We delve into the African political economy to uncover the severity of governance issues and their impact on the domestic economy and the region s role in the international economic order Our book combines economic analysis and political theory to provide a comprehensive understanding of political and economic corruption in Sub Saharan Africa Instead of merely focusing on increasing vigilance coercion and democratic processes we offer insightful analysis to grasp the foundational issues contributing to corruption This book is essential for anyone seeking to understand the complexities of governance and corruption in African nations providing a nuanced perspective on the challenges and potential solutions for development

The Impact of Youth Bulge on Entrepreneurship. The Moderating Role of Institutional Quality Across Different Income Levels Muhammad Mrad, 2024-08-14 Master's Thesis from the year 2023 in the subject Economics Macro economics general grade 10 15 University of Marburg Economics course Economics of the Middle East language English abstract This paper investigates the relationship between the youth bulge and entrepreneurship with the quality of institutions acting as a moderating factor across diverse income levels The youth bulge defined as the proportion of young people in a population is recognized as one of the drivers of economic development However its relationship with entrepreneurship particularly when moderated by institutional quality has not been widely explored This thesis examines this relationship using two different indicators of entrepreneurship and a dataset covering a wide range of countries across the income spectrum The study finds evidence supporting a U shaped relationship between income levels and New Business Density but finds no evidence of such a relationship between income levels and Total Early stage Entrepreneurial Activity The empirical analysis reveals that youth has a negative effect on New Business Density in low income countries and a positive effect in high income countries while it has a positive effect on entrepreneurial activity across all income levels The quality of institutions plays a significant moderating role in shaping this relationship A one percentage point increase in the youth bulge causes an increase in Total Early stage Entrepreneurial Activity by approximately 0.6 percentage points and an increase in the New Business Density index by approximately 0.1 points These results are robust across all models with insufficient evidence for the negative effect of the youth bulge on New Business Density in lower income countries Additionally the study provides evidence of a U shaped relationship between the shadow economy and entrepreneurship as well as between Governance Indicators and entrepreneurship
