## **Constructing The World Constructing The World:**

**World Building** Joanna Gavins,Ernestine Lahey,2016-06-30 World Building represents the state of the discipline in worlds based approaches to discourse collected together for the first time Over the last 40 years the text as world metaphor has become one of the most prevalent and productive means of describing the experiencing of producing and receiving discourse This has been the case in a range of disciplines including stylistics cognitive poetics narratology discourse analysis and literary theory The metaphor has enabled analysts to formulate a variety of frameworks for describing and examining the textual and conceptual mechanics involved in human communication articulating these variously through such concepts as possible worlds text worlds and storyworlds Each of these key approaches shares an understanding of discourse as a logically grounded cognitively and pragmatically complex phenomenon Discourse in this sense is capable of producing highly immersive and emotionally affecting conceptual spaces in the minds of discourse participants The chapters examine how best to document and analyze this and this is an essential collection for stylisticians linguists and narrative theorists

**Constructing Moral Concepts of God in a Global Age** Myriam Renaud,2022-07-29 Constructing Moral Concepts of God in a Global Age focuses on what people say and think about God rather than on arguments about God s existence It advances a theological method or step by step approach to explore and reframe personal convictions about God and the worldviews shaped by those convictions Since a moral God is more likely to foster a moral life this method integrates an ethical check to ensure that understandings of God and their associated worldviews are validly moral The proposed method builds on the work of twentieth century theologian Gordon Kaufman during the Kantian phase of his work It anticipates a person like God who hears prayers loves without end and comforts in times of hardship To accommodate today s pluralistic and globalized world the ethical check integrated in the method is a widely collaborative and vetted global ethic the Parliament of the World s Religions Declaration Towards a Global Ethic This volume of constructive philosophical theology is written for seminary students educators clergy study groups and anyone interested in delving more deeply and systematically into understandings of God whether their own or those of others *Building World* ,1905 **World Building** Marta Boni,2025-10-01 Thanks to modern technology we are now living in an age of multiplatform fictional worlds as television film the Internet graphic novels toys and more facilitate the creation of diverse yet compact imaginary universes which are often recognisable as brands and exhibit well defined identities This volume situated at the cutting edge of media theory explores this phenomenon from both theoretical and practical perspectives uncovering how the construction of these worlds influences our own determination of values and meaning in contemporary society **Building States without Society** Beate Sissenich,2007-01-26 Focusing on the 2004 enlargement of the European Union Building States without Society highlights the real limits of cross national rule transfer even when power is uneven between rule makers and rule takers Tracing the role of labor and other non state actors in transferring rules Beate Sissenich shows the persistent relevance of

national politics specifically state capacity and interest organizations Social network analysis demonstrates that even in a highly integrated Europe state borders continue to structure communications

**Three Decades of Peace Education around the World** Robin J. Burns, Robert Aspeslagh, 2014-01-14 First Published in 1996 The current world order poses new challenges to the theory and practice of peace education Drawing on data gathered from around the world Burns and Aspeslagh focus on how peace is presented in formal and informal educational settings and what effects ideologies have in shaping that presentation The book views peace education in the context of education about other major social and political issues and in a variety of geopolitical settings exploring factors that affect the generation selection organization transmission and evaluation of knowledge for peace Following a review of major approaches to policy and praxis in peace education the editors draw on original research to offer interpretations based on pragmatic normative and conceptual approaches to the individual the state and the role of political literacy The use of a comparative educational framework that goes beyond curriculum studies and descriptive case studies presents a perspective that is innovative and timely The volume includes both bibliography and index

**Engineering World** ,1907 **Electrical World** ,1894 *Dangerous Games* Joseph Laycock, 2015-02-12 The 1980s saw the peak of a moral panic over fantasy role playing games such as Dungeons and Dragons A coalition of moral entrepreneurs that included representatives from the Christian Right the field of psychology and law enforcement claimed that these games were not only psychologically dangerous but an occult religion masquerading as a game *Dangerous Games* explores both the history and the sociological significance of this panic Fantasy role playing games do share several functions in common with religion However religion as a socially constructed world of shared meaning can also be compared to a fantasy role playing game In fact the claims of the moral entrepreneurs in which they presented themselves as heroes battling a dark conspiracy often resembled the very games of imagination they condemned as evil By attacking the imagination they preserved the taken for granted status of their own socially constructed reality Interpreted in this way the panic over fantasy role playing games yields new insights about how humans play and together construct and maintain meaningful worlds Laycock s clear and accessible writing ensures that *Dangerous Games* will be required reading for those with an interest in religion popular culture and social behavior both in the classroom and beyond

**Religion in Global Civil Society** Mark Juergensmeyer, 2005-11-03 The worlds religions are becoming increasingly globalized One can no longer equate particular faiths with corresponding geographic locations Islam is as much a south or southeast Asian religion as it is a middle eastern one And Christianity is growing by leaps and bounds in Africa Asia and Latin America while it declines in Europe In addition to these major population shifts small communities of adherents of every religion are scattered across the globe where they mingle with and adapt to local cultures What are we to make of this new religious world The Oxford Handbook of Global Religions offers a comprehensive look at world religious societies in their contemporary global diversity Comprising 60 essays each by a leading scholar the volume focuses on communities rather than beliefs symbols or

rites Communities in the diaspora and at the periphery are covered as well as the central geographic regions of all the major living religious traditions It is organized into six sections the Indic cultural region the Buddhist Confucian the Jewish Christian and Muslim regions and the African cultural region In each section an introductory essay discusses the social development of that religious tradition historically The other essays cover the basic social facts the community's size location organizational and pilgrimage centers authority figures patterns of governance major subgroups and schisms as well as issues regarding boundary maintenance political involvement role in providing cultural identity and encounters with modernity The world's religious communities are more diverse than ever before and there is no other volume that covers the tremendous variety of faith communities discussed in this Handbook This volume will be indispensable to anyone interested in contemporary religion
