The Colt .45 Automatic Jerry Kuhnhausen, 1986 **Alvin York** Douglas V. Mastriano, 2014-02-20 Alvin C York 1887
1964 devout Christian conscientious objector and reluctant hero of World War I is one of America's most famous and celebrated soldiers Known to generations through Gary Cooper's Academy Award winning portrayal in the 1941 film Sergeant York York is credited with the capture of 132 German soldiers on October 8 1918 in the Meuse Argonne region of France a deed for which he was awarded the Congressional Medal of Honor At war's end the media glorified York's bravery but some members of the German military and a soldier from his own unit cast aspersions on his wartime heroics Historians continue to debate whether York has received more recognition than he deserves A fierce disagreement about the location of the battle in the Argonne forest has further complicated the soldier's legacy In Alvin York Douglas V Mastriano sorts fact from myth in the first full length biography of York in decades He meticulously examines York's youth in the hills of east Tennessee his service in the Great War and his return to a quiet civilian life dedicated to charity By reviewing artifacts recovered from the battlefield using military terrain analysis forensic study and research in both German and American archives Mastriano reconstructs the events of October 8 and corroborates the recorded accounts On the eve of the WWI centennial Alvin York promises to be a major contribution to twentieth century military history **Thunder in the Argonne** Douglas V. Mastriano, 2018-06-15 In July 1918 sensing that the German Army had lost crucial momentum Supreme Allied Commander Ferdinand Foch saw an opportunity to end the First World War In drafting his plans for a final grand offensive he assigned the most difficult sector the dense Argonne forest and the vast Meuse River valley to the American Expeditionary Forces under General John J Pershing There the Doughboys faced thickly defended German lines with terrain deemed impossible to fight through From September 26 through the November 11 armistice US forces suffered more than 20 000 casualties a week but the Allies ultimately prevailed in a decisive victory that helped to end the Great War In Thunder in the Argonne Douglas V Mastriano offers the most comprehensive account of this legendary campaign to date Not only does he provide American French and British perspectives on the offensive but he also offers for the first time in English the German view Mastriano presents a balanced analysis of successes and failures at all levels of command examining the leadership of the principals while also illuminating acts of heroism by individual soldiers The Meuse Argonne Offensive is widely regarded as one of America's finest hours and the amazing feats of Sergeant Alvin York Major Charles Whittlesey of the Lost Battalion and Lieutenant Sam Woodfill all accomplished in the midst of this maelstrom echo across the ages Published to coincide with the centennial of the campaign this engaging book offers a fresh look at the battle that forged the modern US Army

Introduction to Expert Systems Peter Jackson, 1999 In May 1997 IBM's Deep Blue defeated the world chess champion Gary Kasparov showing that an artificial intelligence system can outplay even the most skilled of human experts Since the first expert systems appeared in the late sixties we have seen three decades of research and development engineer

human knowledge to more practical ends in a pioneering effort that has integrated diverse areas of cognitive and computer science. Today expert systems exist in many forms from medical diagnosis to investment analysis and from counseling to production control. This third edition of Peter Jackson's best selling book updates the technological base of expert systems research and embeds those developments in a wide variety of application areas. The earlier chapters have been refocused to take a more practical approach to the basic topics while the later chapters introduce new topic areas such as case based reasoning, connectionist systems and hybrid systems. Results in related areas such as machine learning and reasoning with uncertainty are also accorded a thorough treatment. The new edition contains many new examples and exercises, most of which are in CLIPS, a language that combines production rules with object oriented programming. LISP, PROLOG and C are also featured where appropriate. Interesting problems are posed throughout and are solved in exercises involving the analysis, design and implementation of CLIPS programs. This book will prove useful to a wide readership including general readers, students and teachers, software engineers and researchers. Its modular structure enables readers to follow a pathway most suited to their needs providing them with an up to date account of expert systems technology. Peter Jackson is Director of Research at West Group, a division of The Thomson Corporation and the leading provider of information to the US legal market. Peter drives the application of natural language and information retrieval technologies to the information needs of law and business. Previous appointments include Principal Scientist at the McDonnell Douglas Research Laboratories in Saint Louis, Missouri and Lecturer in the Department of Artificial Intelligence at the University of Edinburgh, Scotland.
