## **Combining Photos Online:**

**Douyin, TikTok and China's Online Screen Industry** Chunmeizi Su, 2023-09-22 TikTok has drawn attention from all over the world. Even if you have never used it before, you would still be familiar with its name. Many people have assumed that it is a US-generated platform and normally awed at its real origin: a Chinese-born and operated platform, a sister or parallel platform of Douyin. Because of the short video platform TikTok and also its dispute with the US government, people have started paying attention to what is really happening and changing in China. Two questions that hang over everyone's mind seem to be why China and why TikTok. This book attempted to answer the question of why short video platforms such as TikTok, the most popular made in China product of all the Chinese digital platforms, became a significant competitor on the global stage. This book explores the reasons behind the rise of short video platforms in China with a focus on the sudden and unexpected success of TikTok and its parallel platform Douyin. Beginning with the historical development of China's online screen industry, the book goes on to investigate the ICT industry, its business models, and impact on the screen industry to unfold the reasons behind the domestic popularity of Douyin. It draws on a spectrum of sources including policy documents, industry reports, and expert analysis, which is supplemented by interviews with key people in the field. It traces the changing dynamics of the Chinese online screen ecology and shows how a mixture of technological, industrial, and cultural factors contributed to the proliferation of short video platforms in China. This engaging and topical book will be ideal reading for students and scholars of media and communication studies, platform studies, and political economy studies.

**Tracing Your Baltic, Scandinavian, Eastern European, & Middle Eastern Ancestry Online** Anne Hart, 2005-06-06 Are you online and ready for global smart card and database genealogy for virtual travelers? Here's how to search family history for nations bordering the Baltic Sea, the Balkans, countries, Scandinavia, Eastern Europe, and the Middle East. The nations listed in this guide all faiths include Finland, Sweden, Norway, Denmark, Iceland, Estonia, Latvia, Lithuania, Poland, Armenia, Assyria, Greece, Lebanon, Syria, and many other lands in the Middle East, the Balkans, Croatia, Macedonia, Bulgaria, Eastern Europe, Hungary, and more. Collecting details about people is moving toward smart card technology and its offspring. The new wave in genealogy is authentication technology. Authentication begins with new wave technology used to gather population registers. Compare the new technology to the old method of door-to-door census taking, tombstone tracings, and city directory publishing. No genealogists are not using smart cards this year, but smart card technology is being used to compile population registers in Europe. The future holds a new wave of technology used for authentication for banking transactions being applied to other areas. Currently, this technology is used for collecting details for population registrars such as census taking. The application for research is of interest to family historians, librarians, and governments. It's already in use by private industry for electronic authentication. Family history is now about intelligent connections, whether it's a population registrar, census detail, or electronic identity for banking. Smart card genealogy began in 1998 in Finland with governments seeking to put

census and population registers in an electronic form that would be available to researchers and these applications are going global
