**Using Content-area Graphic Texts for Learning** Meryl Jaffe, Katie Monnin, 2013 What counts as literacy has been redefined in today's classrooms. Teachers must address what it means to read and live in a multi-literate world that includes both print text and image text. Focused specifically on young adult graphic novels in the four primary content areas: math, language arts, social studies, and science. *Using Content Area Graphic Texts for Learning: A Guide for Middle Level Educators* by Dr. Meryl Jaffe and Dr. Katie Monnin empowers twenty-first-century middle school educators to not only better understand content area graphic novels but also teach them. Like their print counterparts, graphic texts reinforce traditional content area thinking skills like memory, attention, cognition, language, learning, and sequencing. Unlike print texts, however, comics and graphic novels reach out to diverse types of literacy learners and their particular reading strengths, making them the perfect high-quality literary level texts for core content area classrooms. *Using Content Area Graphic Texts for Learning* begins with the building blocks of graphic novel terminology 101, moves into a detailed look at how graphic texts specifically help and empower different types of learners, and then branches off into specific chapters for each of four content areas: math, language arts, social studies, and science. Each of these content area chapters includes an overview of how graphic novels help students tackle, integrate, and enhance content area material, two content area lesson plans each utilizing graphic novels in different ways, a demonstration of what that lesson plan is asking students to do, focusing on five learning skills: attention, memory, language, sequencing, and cognition, and how the lesson aligns with the appropriate content area's Common Core Standards. A discussion on how graphic novels help different types of learners succeed in the content area classrooms and a list of suggested graphic novels for each content area classroom. Jaffe and Monnin make the case for using graphic novels as valid young adult literary texts that engage students and meet Common Core State Standards within the content area classroom.

**50 Leveled Math Problems Level 6** Anne Collins, 2012-04-01 It includes 50 leveled math problems. 150 problems total. An overview of the problem-solving process and ideas for formative assessment of students' problem-solving abilities. It also includes 50 mini-lessons and a student activity sheet featuring a problem tiered at three levels plus digital resources that include electronic versions of activity sheets. This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction.

**Differentiated Instruction** Ervin F. Sparapani, 2013-08-15 In the current standards-based accountability-driven world of education, it is difficult for educators to use differentiated instruction to cater to the individual learning needs of each student. This book explains differentiating instruction in a way that connects to current standards and provides examples of challenging best practice lessons.
