Teaching Children with Challenging Behaviors Gayle Mindes, 2017-08-15 Teaching Children with Challenging Behaviors provides early childhood educators with a guide to developmentally appropriate practice for working with children who exhibit challenging behaviors as well as perspectives for experienced teachers to reflect upon best practices in today's complex world. This highly practical book addresses systemic issues such as classroom management techniques, social, emotional, and behavioral support strategies, curriculum assessment, and utilization of technology, and bridging the existing gap between mental health providers, families, and early childhood professionals. Written in nontechnical language with support from current research, this book will help you navigate the sometimes treacherous terrain of teaching children with challenging behaviors.

An Evaluation of the Public Schools of the District of Columbia National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee for the Five-Year (2009-2013) Summative Evaluation of the District of Columbia Public Schools, 2015-08-31 An Evaluation of the Public Schools of the District of Columbia is a comprehensive five-year summative evaluation report for Phase Two of an initiative to evaluate the District of Columbia's public schools. Consistent with the recommendations in the 2011 report A Plan for Evaluating the District of Columbia's Public Schools, this new report describes changes in the public schools during the period from 2009 to 2013. An Evaluation of the Public Schools of the District of Columbia examines business practices, human resources, operations, and human capital strategies, academic plans, and student achievement. This report identifies what is working well seven years after legislation was enacted to give control of public schools to the mayor of the District of Columbia and which areas need additional attention.

**What Learning Looks Like** Reuven Feuerstein, Ann Lewin-Benham, 2012-05-04 The authors bring to life the theory of mediated learning. Through numerous examples and scenarios from classrooms and museums, they show how mediated learning helps children to become more effective learners. (from publisher description)

**The SAGE Encyclopedia of Contemporary Early Childhood Education** Donna Couchenour, J. Kent Chrisman, 2016-08-16 The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence, and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations, and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as a comprehensive review of best educational practices with young children, effective preparation

for early childhood professionals and policy making practices and addresses such questions as How is the field of early childhood education defined What are the roots of this field of study How is the history of early childhood education similar to yet different from the study of public education What are the major influences on understandings of best practices in early childhood education

**Deep in Thought** Jason Baehr, 2022-10-18 Deep in Thought provides an introduction to intellectual virtues the personal qualities and character strengths of good thinkers and learners and outlines a pragmatic approach for teachers to reinforce them in the classroom With a combination of theoretical expertise and practical experience philosopher Jason Baehr endorses intellectual virtues as a rich meaningful way to think about and understand the purpose of education He makes a persuasive case for prioritizing intellectual virtues in the classroom to facilitate deeper learning encourage lifelong learning and enrich teacher practice Baehr profiles nine key virtues that enable learners to initiate the process of learning maintain forward momentum and overcome common obstacles With engaging anecdotes and concrete examples he presents a wealth of principles postures and practices that educators can employ in promoting essential habits of mind such as curiosity open mindedness and intellectual courage Baehr illustrates how opportunities to practice these intellectual habits can be integrated into the classroom in ways that align with current teaching practices In addition he shows how educators can adapt these practices to accommodate students identities developmental abilities and interests This thought provoking book supports all educators especially middle and high school teachers in teaching for intellectual virtues Deep in Thought is a philosophical and yet practical guide to one of the most important aims of education helping students become skilled thinkers and learners

**Theories of Development** William Crain, 2024-04-25 Theories of Development introduces students to the most influential theorists who have contributed to our understanding of how we develop as individuals The book focuses on the theorists who have built upon the developmental tradition established by Rousseau along with other theorists including ethologists and psychoanalysts who share a developmental outlook It also considers theorists in the environmental learning theory tradition and discusses the practical implications of all theorists work This edition has been thoroughly updated throughout and now includes A new chapter comparing treatment approaches to autism Greater attention to Erikson s theory of identity formation and how it pertains to gender issues New thoughts on cultural factors in Piaget s theory Biographical material on Jane Goodall Howard Thurman and Albert Einstein that illustrate developmental processes Demonstrating how we might view the world differently at various stages of life Theories of Development is a must read for all students of psychology and education
