Communicating Womens Health Influence Communication:

Communicating Women's Health Annette Madlock Gatison, 2015-12-07 This volume explores the conditions under which women are empowered and feel entitled to make the health decisions that are best for them. At its core it illuminates how the most basic element of communication voice has been summarily suppressed for entire groups of women when it comes to control of their own sexuality reproductive lives and health. By giving voice to these women's experiences the book shines a light on ways to improve health communication for women. Bringing together personal narratives key theory and literature and original qualitative and quantitative studies the book provides an in depth comparative picture of how and why women's health varies for distinct groups of women. Organized into four parts historical influences on patient and provider perceptions breast cancer the silence and the shame make it taboo mothering reproduction and womanhood and sex sexuality relational health and womanhood each section is introduced with a brief synthesis and discussion of the key questions addressed across the chapters.

Handbook of Adult Development Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally. However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development (SRAD) with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts. Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion. Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development. Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging. Regardless of the par

ticular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come
