Company,1948 **Ownership of Knowledge** Dagmar Schafer,Annapurna Mamidipudi,Marius Buning,2023-07-18 A

framework for knowledge ownership that challenges the mechanisms of inequality in modern society. Scholars of science technology medicine and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law. Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law, Dagmar Schäfer, Annapurna Mamidipudi, and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership. Toward this end they focus on the notions of knowledge and ownership in courtrooms, workshops, policy and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order. The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them. Unlike scholars who have fragmented this discourse across the disciplines of anthropology, sociology and history, the editors highlight recent developments in the emerging field of the global history of knowledge as science as economy and as culture. The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities. That is, how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know. Oak, Jörn Oeder.

*Eastern Europe* (Richard Frucht, 2004-12-22) A contemporary analysis of the people, cultures and society within the regions that make up Eastern Europe. *Eastern Europe: An Introduction to the People, Lands and Culture* sheds light on modern day life in the 16 nations comprising Eastern Europe. Going beyond the history and politics already well documented in other works, this unique three volume series explores the social and cultural aspects of a region often ignored in books and curricula on Western civilization. The volumes are organized by geographic proximity and commonality in historical development, allowing the countries to be both studied individually and juxtaposed against others in the region. The first volume covers the northern tier of states, the second looks at lands that were once part of the Hapsburg empire and the third examines the Balkan states. Each chapter profiles a single country, its geography, history, political development, economy and culture, and gives readers a glimpse of the challenges that lie ahead. Vignettes on various topics of interest illuminate the unique character of each country.

**Governing States and Localities** (Kevin B. Smith, Alan Greenblatt, 2019-01-03) The trusted and proven *Governing States and Localities* guides you through the contentious environment of state and local politics and focuses on the role that economic and budget pressures play on issues facing state and local governments. With their engaging journalistic writing and crisp storytelling, Kevin B. Smith and Alan Greenblatt employ a comparative approach to explain how and why states and localities are both similar and different. The Seventh Edition is thoroughly updated to account for such major developments as state vs. federal conflicts over immigration reform, school shootings and gun control, the impact of the Donald Trump presidency on intergovernmental relations and issues of central interest to states and localities and the lingering effects of
