Sociologists and anthropologists have had a long interest in studying the ways in which cultures shaped different patterns of health disease and mortality Social scientists have documented low rates of chronic disease and disability in non Western societies and have suggested that social stability cultural homogeneity and social cohesion may play a part in explaining these low rates On the other hand in studies of Western societies social scientists have found that disease and mortality assume different patterns among various ethnic cultural and social economic groups The role of stress social change and a low degree of cohesion have been suggested along with other factors as contributing to the variable rates among different social groups Social cohesion has been implicated in the cause and recovery from both physical and psychological illnesses Although there has been a large amount of work established the beneficial effects of cohesion on health and well being relatively little work has focused on HOW increased social cohesion sustains or improves health This work is based on the premise that there are risk factors including social cohesion that regulate health and disease in groups One of the challenges

power source of the cells As Dr Maloof shows the intense all or nothing approaches commonly used by biohackers to optimize health including sustained fasting ultra low carb diets and intense training can be harmful especially for women because they create excessive stress in an already stressed body which can make us tired weak and prone to illness Dr Maloof s innovative program which has been used successfully by her patients offers lifestyle changes that target the unique biology of women and provide immediate and long term benefits Instead of denying our bodies we need to listen to what they are telling us Once we become aware of our physical needs we can give ourselves the resources to become more connected nourished safe and strong at both the micro and the macro level With cutting edge biohacking insights strategies for personalized nutrition hormonal health and stress management The Spark Factor is the book women have been waiting for to help them reclaim their vitality and achieve lasting health
