

Activities for Kids

Build a Ramp City

Use cardboard, books, or blocks to create ramps. Test how cars, balls, and random toys move down. Talk about speed, height, and friction (without using the word friction, obviously).

DRY Balance Scale

Make a simple balance scale using a hanger, string, and cups. Let toddlers guess which items are heavier or lighter.

Sink or Float Sorting Bin

Fill a tub with water.
Gather random objects.
Let them guess and sort:
"Will it sink or float?"

Ice Excavation

Freeze small toys in ice. Hand toolsters squeeze bottles of warm water or droppers to free the toys. A great intro to states of matter.

Color Changing Flowers

Put white flowers in colored water and watch them change over time. Talk about absorption and patience.

Shadow Tracing

Go outside, trace shadows of toys or themselves with chalk. Watch how they move as the sun moves.

Fizzy Science

Add baking soda to a tray, give toddlers droppers with vinegar + food coloring. Instant bubbly fun!

Build a Bridge

Give them blocks, cardboard, popsicle sticks. Challenge: Can you build a bridge that holds a toy car?

Pattern Building with Snacks

Create and extend simple patterns using cereal, fruit, or crackers.

Lego Towers by Measurement

Challenge them to build towers as tall as different objects — their shoe, a book, a cup.

Sound Guessing Game

Fill containers with different materials (rice, coins, cotton balls). Shake and guess what's inside based on sound.

Texture Walk

Make a path with materials like bubble wrap, foil, towels, and sponges. Let them walk barefoot and describe textures.

Bubble Geometry

Blow bubbles and pop them on paper. Count sides, look at sizes, or just talk about shapes.

to encourage children to question like scientist design like a technologist build like an engineer create like an artist deduce like a mathematician and play like a kid **STEM Activity Book: Science Technology Engineering Math** Catherine Bruzzone, Sam Hutchinson, Jenny Jacoby, 2018-08-07 The acronym STEM stands for Science Technology Engineering and Math. These subjects are closely related to one another and are sometimes overlooked as critical subjects in education, often dismissed by students and teachers after primary education is completed. However, the need for these subjects in our society is crucial. The aim of this book is to pique the interest of children in these areas of study, stress the importance of these subjects, and help encourage children who are interested to continue within these fields as they grow and learn. Whether it is through marvelous mazes, puzzles, testing quizzes, and other fun activities, this book introduces children to the inner working of the world around them and might even one day inspire them to contribute an invention or a theory of their own. Stem Starters for Kids Technology Activity Book Catherine Bruzzone, 2017-09-05 Perfect for back to school, summer bridge, and after school activity. Part of a series where each book stresses an area of STEM: Science, Technology, Engineering, and Mathematics. There are no other activity books on STEM available. Not gender specific, will appeal to both boys and girls, ages 7 to 11. Simple explanations of the sciences with engaging activities to help engage young learners in the subjects. *Built for More* Byron Sanders, Shannon Epner, 2024-05-24 Built for More explores the role of out of school time (OST) programs in preparing youth for the future workforce. It highlights research and practices related to employability, including internships and mentoring, while amplifying voices from BIPOC and marginalized communities.
